### Description

Adobe Creative Cloud 2019 comes with new applications, new features and new ways of creation, however, its main products are starting to give up the classic Windows 7. For example, their hardware (graphics card) acceleration feature is only available under Windows 10 now. That's to say, from now on, you'll be forced to stop using Windows 7 OS if you want to enjoy the full capabilities and performance of Adobe's mainstream programs.

Adobe CC 2019 put its activation module in the main program EXE file or DLL file, canceled the classic activation module amtlib.dll, and thoroughly disabled the offline activation method. Instead, it now employs a brand-new activating way – so called a new generation of license, which aims to provide a safe, modern and seamless licensing platform and experience. In other words, now when you start Adobe CC 2019 product, you may be asked to enter your Adobe ID and password first. This also means that the traditional amtlib.dll cracking methods are completely ineffective now.

At the same time, AMT Emulator and other cracking tools based on unlimited trials don't cover all of Adobe products. The former does not support Adobe Photoshop Lightroom, and the latter does not support Adobe Bridge, Adobe Media Encoder. That means there's still not going to be a full series of perfect cracking tool for some time after Adobe CC 2019 is released. Anyway, Adobe CC 2019 AIO Patcher may be the first to get as close as possible to this point.
