Description

It has been enhanced with the latest GPU acceleration technology which will let the users to view the results before rendering the video. This technology will also let you control the frame rate and aspect ratio faster. It supports a very wide range of cameras which includes Sony, Nikon and Panasonic etc. This will eliminate the transcoding process which is quite time taking activity. It has got great integration with Adobe Photoshop, Illustrator, Audition and After Effects etc. This application also supports track targeting in which you are going to place the source sequences to other sequences. All in all Adobe Premiere Pro CC 2017 v11.0.1 is an awesome application which will let you capture and edit the content by providing exporting and publishing capabilities.
