Description

Automatic Copyright Year V1.1 WP Plugin Free Download

Automatic Copyright Year V1.1 is Automatic Copyright Year seeks to solve a common problem: keeping your copyright year up-to-date.

It's a problem all of us had: on January 1st every year, we need to go through every one of our websites and update all the footers. And when we see other people's sites that, in the footer, say, "(c) 1998" then suddenly it's revealed how out-of-date the site is.

With Automatic Copyright Year, this problem will never happen to you!

Instead of going through every site you have each year on the 1st of January and change the year manually, now it will all be done seamlessly for you. Just install the Automatic Copyright Year plugin and voila: your sites will always have an up-to-date copyright.
