The Bank of Japan (????, Nippon Gink?, BOJ) is the central bank of Japan. The bank is often called Nichigin (??) for short. It is headquartered in Nihonbashi, Ch??, Tokyo.

The bank is a corporate entity independent of the Japanese government, and while it is not an administrative organisation of the state, its monetary policy falls within the scope of administration. From a macroeconomic perspective, long-term stability of prices is deemed crucial. However, the political sector tends to favour short-term measures. Thus, the bank's autonomy and independence are granted from the standpoint of ensuring long-term public welfare and political neutrality.
