Beini – a small Linux distribution, a wireless network security testing system, based on the Tiny Core Linux.

With the wireless networks (IEEE 802.11) devices proliferate, wireless network security issues become the focus of attention. Beini is used for wireless network security assessment of a system.

It offers an array of WiFi security audit tools. Beini is easy for newbie to used compare to BackTrack, which is the popular system used to crack WEP/WPA.

Beini include packages such as: Minidwep, Aircrack, Inflator, Reaver, Feeding Bottle, Wifite.

The latest version was released in April 2013.
