Description

Brave Web browser Free Download

Brave V1.3.361.131 is a free and open-source web browser developed by Brave Software, Inc. based on the Chromium web browser. Brave is a privacy-focused browser, which automatically blocks online advertisements and website trackers in its default settings.

IMPORTANT NOTE: BRAVE BROWSER IS MUCH BETTER THAN UC BROWSER BECAUSE UC BROWSER IS A CHINESE APP AND INDIA HAS RECENTLY BANNED UC BROWSER.

BRAVE BROWSER BLOCKS ADS AND BOOSTS DOWNLOAD SPEED BETTER THAN UC BROWSER. TRY ONCE. YOU WILL NOT REGRET IT. YOU CAN ALSO EARN MONEY (BAT CRYPTOCURRENCY) WITH BRAVE.

Features:-

BROWSE FASTER

Load pages 3x to 6x faster

Watch Brave in action, head-to-head against Chrome and Firefox. Brave loads pages three times as fast out of the box with nothing to install, learn or manage.

Import and continue where you left off

It's easy to import your settings from your old browser. You can do it during the welcome tour or later through the menus.

All of your old browser profiles will appear in a list. You can import other browser data through the main menu item called "Import Bookmarks and Settings."

Support your favorite sites with Brave Rewards

Turn on Brave Rewards and give a little back to the sites you frequent most. Earn frequent flyer-like tokens (BAT) for viewing privacy-respecting ads through Brave and help fund the content you love

Browsing the web with Brave is free: with Brave Rewards activated, you can support the content creators you love at the amount that works for you.

Brave can automatically distribute your contributions based on how much time you spend on sites. Or, you can choose to tip sites directly, and even offer a fixed monthly tip amount.

All of this works while keeping your browsing history private. Your funds are made available to site owners through an anonymous ledger system, so you can't be identified based on the sites you visit and support. Over 10,000 publishers and content creators have registered to receive Brave Rewards.

Remember: these contributions are optional – browsing the web with Brave is free.

Experience unparalleled privacy and security.

Brave fights malware and prevents tracking, keeping your information safe and secure. It's our top priority.

We're not in the personal data business.

Our servers neither see nor store your browsing data – it stays private, on your devices, until you delete it. Which means we won't ever sell your data to third parties.

Customize your shield settings

Choose your settings on a per-site or browser-wide basis. See how many ads

and trackers are being blocked by Brave every day on the New Tab Page.

Security meets simplicity

If you're willing to research, download, and install multiple extensions, and carefully configure and correctly maintain settings in both the browser and extensions, you can match some of Brave's privacy and security.

Brave does all that work for you. Simple, right?

Whenever possible using the HTTPS Everywhere list, Brave automatically upgrades to HTTPS for secure, encrypted communications when an ordinary browser would use an insecure connection.

Defaults that matter

Browse confidently with default settings that block phishing, malware, and malvertising. Also, plugins, which have proven to be a security risk, are disabled by default.

Sync your devices bravely

Brave Sync, currently in beta, can be enabled to encrypt and synchronize your preferred settings and bookmarks. However, Brave does not have the keys to decrypt your data.

> Shields

- * Ad blocking
- * Fingerprinting prevention*
- * Cookie control*
- * HTTPS upgrading*
- * Block scripts*
- * Per-site shield settings
- * Configurable global shield defaults

> Security

- * Clear browsing data
- * Built-in password manager
- * Form autofill
- * Control content access to full-screen presentation*
- * Control site access to autoplay media
- * Send "Do not track" with browsing requests

> Playlist

(iOS only)

- * Make a playlist. Right in your browser
- * Save now, watch or listen later
- * On a flight, a commute, or a road trip to nowhere
- * Any media, any stream
- * Learn more about Playlist

> Tabs & Windows

- * Private Windows
- * Pinned Tabs*
- * Auto-unload*
- * Drag and drop*
- * Duplicate*
- * Close Options
- * Find on page
- * Print page

> IPFS Integration

- * Browsing without intermediaries
- * Access content directly from the IPFS network
- * Resolve ipfs:// URIs natively or via a gateway
- * Install a full IPFS node in one click

> Extensions / Plugins

- * Brave Desktop now supports most of the Chrome extensions in the chrome web store

> Sidebar

- * Add a site or URL bookmark to the sidebar to easily access your favorite websites in a browser window (including private windows and private windows with Tor)
- * Delete, rename, reorder (drag-and-drop), or organize
- * Quick access to Brave Talk and Brave Wallet
- * Customize in `brave://settings/appearance`

> Address Bar

- * Add Bookmark
- * Autosuggest URLs
- * Search from address bar
- * Autosuggest search terms
- * Show/hide bookmarks toolbar*
- * Show secure or insecure site

> Night mode

- * Protect against eye strain by setting web pages to automatically load with a darkened background
- * Available on desktop, Android, and iOS
- * Learn more about Night mode

> Speedreader

- * Brave's custom reader mode removes unnecessary elements from pages it recognizes as articles, and displays them in a simplified format. Speedreader identifies and removes web bloat like trackers and privacy-eroding page elements and, unlike other reader modes, it does this before a page loads or renders. That means better privacy, faster load times, and data plan savings. Learn more about Speedreader.

> Search

- * Choose default search engine
- * Use keyboard shortcuts for alternate search engines*
- * Option to use DuckDuckGo for private window search*

> Brave Firewall + VPN

- * (paid feature, iOS only)
- * Unlike many browsers that offer VPNs which mask a user's IP address, Brave's Firewall + VPN, powered by Guardian, offers enhanced security and privacy by encrypting and protecting anything users do while connected to the Internet.
- * Learn more about Brave Firewall + VPN
- * Block trackers across all apps
- * Protects all connections
- * We never share or sell you info
- * VPN server does not know who you are

> Custom backgrounds

- * Add your own image to appear as the background on any new tab
- * Add multiple images to create a rotation of your favorite pics
- * Easily crop, resize, or edit
- * Change at any time
- * Customize in `brave://settings/newTab`

> Sync / password sync

- * Easily sync your Brave user profiles between devices, including desktop <> desktop, Android <> desktop, or iOS <> desktop
- * Bookmarks
- * Passwords
- * Autofill data
- * History
- * Open tabs
- * Extensions
- * Themes
- * Apps
- * Learn more about Sync

> Brave Rewards

- * Earn by viewing private ads
- * Tip your favorite creators
- * Contribute monthly to sites
- * Auto-contribute to sites
- * Verify with Uphold and move funds in and out of your wallet
- * Become a verified creator and start earning BAT from tips, contributions and referrals
