Description

ChatBot for Woocommerce Pro WP Plugin Free Download

Woowbot Woocommerce Chatbot Pro V1.2.3.1 is a SIMPLE and Native WordPress eCommerce ChatBot with zero configuration or bot training required. This plug n' play chatbot or conversational, eCommerce shopbot does not require any 3rd party service integration.

This is a simple eCommerce ChatBot that lets your woocommerce shoppers search and find the right product quickly. If the shopper does not find the product they are searching for, they can email the shop admin directly from the ChatBot window.

This shopping bot helps shoppers find the products they are looking for easily and increase store sales through conversational chatbot experience and increases your customer conversion rates!

You can make this plug n' play ChatBot to work with any language with very little effort. Just change the languages from the ChatBot control panel.

A pro version of the ChatBot plugin is available with tons of advanced features that can provide automated customer support and can be integrated with OpenAI (ChatGPT) or Google's Dialogflow.

NEXT GENERATION CONVERSATIONAL COMMERCE FOR WOOCOMMERCE

Conversational commerce is the future of eCommerce. Enter WoowBot: a new way of customer interaction that allows brands to connect with their customers on a personal level with shoppbots while creating a more natural interaction that mimics the physical world. 24/7/365, the WoowBot ChatBot can provide live chat support to your shoppers and provide product search services, order status (pro feature) or support(pro feature). Increase customer satisfaction, reduce costs to scale and improve ability to engage customers.

WHAT CAN THIS CHATBOT DO?

WoowBot is the first of its kind chatbot shop assistant for WordPress WooCommerce. It is a Plug n' play, Stand Alone WooCommerce Shopping ChatBot that can help Increase your store Sales.

With the ChatBot Pro version, shoppers can converse fluidly with the Bot – thanks to the Integration with OpenAi (ChatGPT) or Google's Artificial Intelligence and Natural Language Processing (AI and NLP) from Dialogflow, Search and Add products to the cart directly from the chat interface and get Support.

When activated, WooWBot Chat Bot sits there floating at the right bottom corner of website and offers users to find the right product through intelligent chat conversation based search like a live assistant. WoowBot can also provide support and allow shoppers to contact the store admin from the chat in various ways.

WOOWBOT FREE VS PRO VERSION

WoowBot free version is a great Chat Bot tool for a small online store that does not require the advanced features of the pro version bot. The free version features list:

- One template
- Chat and search for products
- Search using WooCommerce standard search function that uses title and description
- Display products found and link to the product page
- Adjust location of the button
- Upload Custom Chat Icon
- Language center to modify bot responses (in any language)
- Custom CSS box
- MO/Port included for translation of multi language in back end

WOOWBOT PRO FEATURE HIGHLIGHTS

- Artificial Intelligence and NLP

WoowBot is Intelligent – Powered by AI. Integrate with OpenAI (ChatGPT) or Google's DialogFlow. It is capable of Small Talk, can carry on a conversation flow and fulfill any reasonable request.

OpenAI (ChatGPT) for WoowBot Pro

As soon as you add the OpenAI API key to the ChatBot OpenAI settings, it can answer all types of generic questions. Questions like “what is the capital city of Japan” or “What is a blackhole?” You can format your custom Dataset as a .jsonl file. Then upload and train (Fine tune) your chosen OpenAI model. Once trained OpenAI will use your custom dataset to answer natural language questions.

You can train the OpenAI API with your WordPress Pages, Posts and Custom Post type content! After generating the dataset with your website data you can download it to make further adjustments or troubleshooting or send the dataset directly to OpenAI for fine tuning.

Create royalty free AI generated images just by writing what kind of images you want. Select the image you like and download it directly to your WordPress media library. You can select from a wide variety of options to fine tune your image style, lighting, color, size etc.

Use OpenAI to generate SEO friendly articles and contents for your Blogs and any other purposes. Options to fine tune your articles (How many headings?, Heading Tag, Writing Style, Writing Tone, Image Size, Language, Add Image, Add Tagline, Add Introduction, Add Conclusion, Add Faq, Anchor Text, Target URL, Add Call-to-Action, Call-to-Action Position, Add Keywords, Keywords to Avoid, Make Keywords Bold etc.)

Onsite Retargeting, Exit Intent

Recover up to 25% of Abandoning Visitors with Onsite Retargeting. WoowBot detects exiting Visitors and displays a targeted offer to your visitor determined by you. Up to 25% of retargeted visitors will respond to your message and turn into customers. Targeted offers can be a coupon code, free ebook etc.

In-Chat Support and Contact

The Onsite Retargeting helps your Conversion rate optimization by showing special offers and coupons on Exit Intent, time interval or page scroll-down inside the ChatBot window. Track Customer Conversions with statistics to find out if shoppers are abandoning carts without completing orders. Get more sales!

Reduce Shopping Cart Abandonment

In addition to exit intent and remarketing offers, WoowBot can remind users to complete the checkout process when shoppers have products in the cart but they are not completing the order for some reason. Many shoppers add products to the cart but leave the site from other pages, after continuing to browse, before or after they reached the cart page.

If a user leaves the site and later comes back – WoowBot will remind the shopper with a custom message to complete the order!

All of these will translate into a much higher rate of customer conversion by reducing the potentials for Abandoned Cart.

In-Chat Support and Contact

WoowBot pro provides support directly from the Chat window. You can add commonly asked questions (FAQ) and answers in the backend that WoowBot will display when user goes to support area. If the shopper does not find answers to his question in the FAQ, he can opt to send a email to site admin or leave feedback!

Schedule the ChatBot to Work with other Live Chat Service

You can schedule WoowBot Pro to run only when you are not available for Live chat with other services – outside of your normal office hours.

The Onsite Retargeting helps your Conversion rate optimization by showing your special offers and coupons on Exit Intent, time interval or page scroll down inside the chatbot window. Get rid of those other Exit Intent popups with a chatbot that talks directly with the shopper. Reduce Abandoned Cart by showing timely messages with the Chat Bot!

Here is a list of the WoowBot pro version feature highlights:
