### Description

eShop Web V2.0.5 - Multi Vendor eCommerce Marketplace / CMS Free Download

A modern multi vendor marketplace like never before where Vendors, Store Owners, Retailers, and Whole Sellers can showcase or sell their products on a single platform.

A modern multi vendor marketplace like never before where Vendors, Store Owners, Retailers, and Whole Sellers can showcase or sell their products on a single platform.

### Elegant Home page

Eye-catching and easy to access home screen where you can display search options, sliders, various sellers, dynamic product sections, categories and more.

### Dynamic Products Sections

Most loved and demanded feature, where you can create dynamic products sections with wide options to choose from like Newly, added products, Products on Sale, Top Rated Products, Most Selling Products and Custom Products from All or Specified categories.

### Products Listing

Powerful products listing page with list view and grid view display options, Advanced Filter by and Sort by options. Product Details Attractive and informative product details view which gives your customers complete information about the product. Product images and video, Product specifications, product variants and its prices, customer reviews, seller information and related products list all such information is displayed in nicely organised manner.

### Product Swatches

Color Swatches, Image Swatches and Text Swatches to create intriguing and easy to differentiate product variants.

### Product Attributes, Tags and Filters

Create unlimited attributes to allow your products filter efficiently in sections, product lists, search results and more. You can create attributes for Colors, Sizes, Brands, Weights, Storage and much more. You can also associate different tags to the products to make overall search experience smoother and accurate.

### Zip codes

Check whether the product you're looking for is deliverable in your area or not prior to adding it to cart.

### Categories

Manage and Display unlimited categories for unlimited levels also show popular categories based on the user's activities, your desired categories and all other categories with ease.

### Promocodes

Improved version of promo code section where you can list promo codes easily to allow your customers to choose from any available promo codes.

### Cart & Save for Later

Store & manage your products on server cart and access it across the platforms and devices. You can also save your products for later checkouts from cart if not willing to continue during the current checkout.

### Multiple Addresses

Manage your multiple addresses, either it could be your home address or office address choose among multiple addresses easily while checkout.

### Checkout

Addresses, Preferred Delivery Date Time options, Various Payment methods to choose from and order summary gives enough details about the order to be placed to the sellers, vendors and system admins.

### Payment methods

Give your customers the multiple payment options to choose from which are easily manageable at just one click. We have Cash on Delivery, PayPal, Razorpay, Paystack, Flutterwave, Stripe, Paytm and Direct Bank Transfer payment options to name a few.

### Orders and Invoices

Find and Track every item of order with precise information available starting from the received state to delivered state. You can also find or download your invoices anytime you want.

### Wallets

Built-in wallet functionality to make order making experience more faster. Recharge your wallet and also keep track of every wallet transaction easily.

### Languages, Themes and more

Apart from all these excellent features eShop has many more other important features like multilingual support ( LTR and RTL languages support ), light and dark theme support, Customer support system, Refer and Earn and more.

### Powerful Admin Dashboard

Powerful Admin Dashboard with multiple managers with module wise permissions feature to manage sellers, products & categories, orders, sliders & offer banners, manage featured sections & much more.

### Seller panel

Easily manage sellers from the dashboard. Approve / Reject their registration requests, view / manage their products.

### Products & Variants
