### Description

Ethereum Wallet V4.10.7 WP Plugin Free Download

Ethereum Wallet V4.10.7, The WordPress Ethereum Metamask Wallet Connect plugin auto-creates a user wallet upon registration and allows user to send Ether or ERC20/NFT tokens from it.

Using these two plugins your non-techie customers can register to obtain an Ethereum account address and then buy your NFT or ERC20 tokens to be sent to this new address.

### Features:

Tokens list is auto populated based on tokens balances.

QR Scanner is provided for the reciever address.

The Ethereum Gas price is auto adjusted according to the EIP1559 or form the blockchain if the EIP1559 is not supported by the blockchain configured.

### PRO Features:

Full ERC20 and NFT tokens support in the PRO version! Free 7 days Trial is available!

ERC1155 NFT token standard support

Admin markup feature to earn Ether fee from your site's Ethereum Wallet users

Custom/private blockchain feature: Ethereum Node JSON-RPC Endpoint and other related settings to use Binance Smart Chain (BSC) Config, Polygon (MATIC) and any other EVM compatible blockchain

Multi-vendor support for the Cryptocurrency Product for WooCommerce plugin

Tools / Ethereum Wallet submenu can be used to manually recalculate user account balances

User account addresses initialization on the Tools / Ethereum Wallet page. Useful if plugin is installed on the already established site with many users registered.

ERC1404 Simple Restricted Security Token Standard support. If transfer is not allowed, corresponding error message would be displayed.

The EthPress NFT Access Add-On support. The account generated is tested for NFTs configured ownership.
