Description

Fancy Product Designer V6.1.91 WP Plugin Free Download

Fancy Product Designer V6.1.91 for WooCommerce WordPress

The most successful Product Designer with more than 15000 sales!

Give your customers the freedom to design any type of product

- no limitation: decide which products and which part of the product can be customized
- functions, features and user interface are developed to fit any product
- helpful layer system to keep track of applied designs
- individual product views, interactive upload zones and bounding boxes for precise customization

Customize your products in multiple ways

- Many Media Sources**
 - customers can upload images from any device, from social media accounts or choose from design categories that you provide
 - supported data formats are JPG, PNG and SVG
- Advanced Colour System**
 - customers can apply any colour using the colour picker tool or by choosing from a given pre-defined range of colours
 - colours can be linked, so that changes in colour will be mirrored for other elements
- Text Transformations**
 - set up your own font library using custom, system or Google fonts
 - customers can create curved, outlined or even patterned text and apply standard modification options like bold, italic, underline, alignment etc.
- Image Transformations**
 - images and graphics can be transformed with various options like changing position, size, rotation and opacity
 - images can be applied with a grayscale or two different sepia filters

Compose your own interface
by using various layouts

- define size, colour and position of the interface elements or choose a pre-defined layout
- change modules and actions of the Product Designer according to your specific needs

Set flexible prices for
products and elements

- set different prices for products, materials, colours, text, images and graphics
- assign a set price for every additional layer as well as by layer type or for different product views

Main reason: Feature Availability
Extra comments from the buyer: First, this plugin is AMAZING! Wonderful features & tons of customization options. Additionally, the customer support is fantastic! Extremely fast responses and great effort in resolving any issues that may arise! I recommend this plugin for anyone who needs this feature! Endless possibilities! I look forward to future updates and am ecstatic that I found this!
