Description

Flex is super flexible, multi-purpose Joomla template that can fit in any type of website you are building. It is clean, responsive, includes drag & drop Layout and Page Builder and comes packed with powerful options! With stunning animations and eye-catching layouts, Flex will help you draw attention of visitors at first sight.

Flex is best selling Joomla template on ThemeForest in 2016, starting at the end of February 2016. The story continues in 2017!

Compatible with latest versions: Joomla 3.9.4 and VirtueMart 3.4.2.

Powerful Helix 3 Framework made with Bootstrap 3.4.1.

Drag & Drop Layout Builder and SP Page Builder Pro Integration. Flex is coming with fantastic page builder very easy to use and to edit. Only with drag and drop you can create complex layouts. With lightning fast SP Page Builder you can easily customize your website just in few clicks. Fastest and the most powerful drag & drop builder available.

68+ Addons Included:

Carousels, Slider, Buttons, Gallery, Team, Tabs, Flip Box, Accordions, Countdown, Animated Number, Modals, Timeline, Person, Pricing, Pie Progress, Google Maps and Ajax Contact forms, Call to Action, Buttons, Testimonials and more.

Latest Posts

Introducing “Ajax Intro Articles Module”

Exclusively in Flex: super flexible Ajax Intro Articles Module shows the list of the most recently published and current Articles in Masonry Grid with Ajax Loading (Intro content).

Examples:

Homepage Demo (Latest Posts From Our Blog)

Masonry Grid with Ajax Loading Demo

Equal Heights with Ajax Loading Demo

2 Columns + 1 Column Sidebar Demos

2 Quickstart Packages: with or without Virtuemart, both with demo data installer (Joomla 3.9.4, Template, used extensions, demo content).

Install Quickstart demo to get same website as our demo site without any difficulties.

Fully Responsive Design with 7 Unique Home Layouts. Full Window Background and Onepage layouts included.

Newsletter Integration. We also added support for AcyMailing newsletter, because we know that email works a lot better than any other online marketing tool.

SP Cookie Consent Plugin will help you to implement "Cookies Alert" box anywhere on your website, in order to meet GDPR Privacy Policy [[link](#)].

Multi-purpose AP Smart LayerSlider (Save \$24) included.

Portfolio component – Advanced, custom built version of SP Simple Portfolio with additional 2 styles for filter (tags), lightbox gallery, and custom dimensions for videos in lightbox gallery. Perfect portfolio solution for designers, photographers, artists, professionals and all kinds of creative business.

VirtueMart 3.4.2 Integrated. VirtueMart turns your Joomla! site into a powerful and full-featured e-commerce system. Create online shops and online catalog with ease. Configure the extension to handle multiple products and categories and support a wide range of shipping and payment options.

Payments, shipments, coupons, calculation rules, ...

Real multi currency with auto updating rates

Ajax Off-Canvas shopping cart module

Ajax navigation between products

Ajax one page checkout

SEF/SEO integrated

Multilingual

Multiple Headers.

Flex comes with several header layouts to match your personal taste. Classic header with navigation, centered or inline, transparent, with video background, white, coloured or something more complex and place your ads and banners inside header.

Lazy Loading for Images included in template, with option (enable/disable) in template's admin.

Mega Menu Builder & Off-Canvas Menu.

Vertical Accordion menu, for all module positions. Native, vertical accordion menu is now a part of template, no need to buy extra module.

8 Article Post Formats: standard, video, gallery, audio (Soundcloud and Mixcloud), link, quote, status and custom. Each can be customized in the Article Manager to individualize your feel for blogging.

"Parallax" scrolling effect for background content (i.e. an image), while scrolling.

Font Awesome 4.7 (675+ Icons) + 202 Thin Pixeden Icons (v1.2)

Multi-languages Support.

Fluid and Boxed Layout – Use wide (default) or boxed layout variant.

Optional Page Title Options.

Sticky Header with Mainmenu. Improve your website usability using Sticky Header feature. Main menu and logo will always be at the top of the screen, automatically following when user will scroll down. Easily turn the sticky header on or off in template options panel.

CSS & Javascript Compression. Simple to use options to compress almost all CSS and JS template and Joomla files, which as a result will improve speed up of your website.

Support for RTL languages. With carefully styled every part of template for RTL (right-to-left), Flex supports middle eastern languages such as Hebrew and Arabic which are written predominantly right-to-left.

Unlimited Colors. Eight preset styles allows you to choose your own colors. Beyond that using custom CSS allows you to override all used color presets.

Retina Perfect. Perfect pixels and vectors looking great on higher resolution devices like retina or 4k display.

Built With HTML5, CSS3 & Less. Flex was based on a fast less preprocessor with additional functionality like variables, mixins, and functions for compiling CSS.

700+ Google Fonts with update button – Typography based on Google Fonts, with unique update button, support for Subsets (like Latin Extended, Cyrillic Extended for example), choose font weight and font size for several HTML tags (H1..H6) and navigation.

Logo Options. From template settings you can choose logo type, logo position, logo image (also for retina screens) and upload logo used only for mobile devices.

Custom Code. Use your own custom code, for example: CSS, JS, meta tags, links and verification code by using the custom code fields or input more lines of styles inside custom.css file.
