FOX - WooCommerce Currency Switcher Professional V2.4.1.9 - Multi Currency [WOOCS]

WooCommerce Currency Switcher Professional – FOX (former name is WOOCs) is WooCommerce multi currency switcher plugin, that allows elevate your WooCommerce store. With real-time currency rates, your customers can effortlessly switch between different currencies and view product prices tailored to their preferences. Whether they choose to pay in their selected currency or stick to the default, our plugin provides a seamless and user-friendly experience. Additionally, you have the flexibility to add any currency to your WooCommerce store, catering to a global audience. Unlock the full potential of your e-shop with the best WooCommerce currency switcher plugin available!

[Flexible checkout] – As a store manager, you have the freedom to decide how your customers make payments. With our WooCommerce Currency Switcher, you can choose whether buyers pay in their preferred currency or the base currency of your store. This optional feature allows you to tailor the payment process to meet your business requirements. Whether you want to offer complete currency flexibility or prefer transactions to be conducted in the base currency, our plugin provides the control you need. Empower your customers with choice or streamline payments in the familiar base currency – the decision is yours.

[Manage checkout by GeolP rules] – Take advantage of our intuitive interface and set up payment rules based on country-specific currencies. By enabling this feature, your customers will appreciate the convenience of paying in their own currency, eliminating the need for currency conversion and ensuring transparency in pricing. Enhance customer satisfaction, reduce friction during the checkout process, and expand your global reach with our flexible payment options.

[Set Fixed Product Prices in Every Currency: Take Control of Pricing] – FOX WooCommerce Currency Switcher offers you the ability to set fixed prices for each currency, independent of the exchange rate. As a store manager, you have full control over the pricing strategy for different currencies, ensuring consistency and predictability for your customers.

[Manage prices based on User Role] – FOX offers a powerful feature that allows store managers to set product prices based on the user's role. This functionality is particularly useful for stores with a hierarchical user system, where different user roles have varying levels of privileges and access.

[Manage payments rules] – With this feature, the store manager has the ability to configure and assign specific payment methods for each currency available in the WooCommerce store. This means that customers paying in different currencies can be presented with tailored

payment options that are most convenient and relevant to their specific currency. Woocommerce Currency Switcher Payments rules

[Flexible Exchange Rate Updates] – flexibility for the store manager to decide when and how often to update the exchange rates. We understand that currency exchange rates can fluctuate, and it's important to have control over the update process. With our plugin, you can easily customize the update settings to fit your business needs.

[Set custom money signs] – FOX empowers store managers to go beyond the boundaries of traditional currencies. With our plugin, you can enter and use a variety of custom currency symbols that may not even exist in reality. This opens up exciting possibilities for stores with unique business models, such as gaming stores or virtual marketplaces.

[Individual GeoIP rules for each product] – offers the powerful functionality of setting individual GeoIP rules for each product in your store. With this feature, you can tailor the currency display and pricing based on the geographical location of your customers, providing a personalized and localized shopping experience.

[Statistic by currencies switching and orders] – FOX provides a powerful tool for analyzing the currency usage by your clients. Our plugin collects comprehensive statistics that take into account both the currencies switched by your customers and the currencies used in their orders. This valuable information allows you to gain insights into customer preferences, track currency trends, and make informed business decisions.
