FWCMS or Foreign Workers Centralized Management System is a holistic and integrated solutions which allows the overall process of recruiting migrant workers reduced significantly. The solution eliminates all manual and time consuming processes with an integrated and online process.

All application processes can be done online and employers can perform all transaction anytime from the comfort of their office.

The system addresses the issue on leakages or corruption in the existing system by having an automated and online process with very minimum physical interactions to avoid chances for corruption to happen.

Due to the system robustness, FWCMS is capable to address concerns raised by ILO and TIP report in order to protect the welfare and interest of the migrant workers.

FWCMS is a multi touch-point system, involving a full-fledged web-based online management system backed by a secure data processing management infrastructure developed for the Government of Malaysia.
