Description

GBWhatsApp APK Free Download

(Anti-Ban) Latest Version

Fixed all bugs, Dark Mode and all new

Use the official GBWhatsApp, be safe and beware of those scripted malware found as GBWhatsApp on some websites

Get lots of themes created by some users of this app, all of those themes are free

If you want to use dual WhatsApp on the same device you can do so by using GBWhatsApp, you can use the normal version of Whatsapp and the GBWA at the same time on the same device

You may like to put your daily story on Whatsapp status, images, quotes, videos and more but all these can't be copied in the ordinary version of WA. You are able to do so in GBWA

The problem we usually face in WA is the problem of sending large files like APK files, video files, songs, and other data. This Mod version of GBWA allows you to send video files up to 50MB and audio files up to 100MB, you can also decrease/increase the limit in settings

The most famous feature of GB Whatsapp is the hidden message ticks. You can hide your message blue double ticks, double ticks to your contacts

When you open WhatsApp app you expose your being on WA to your contacts, you can be online without letting know to them by turning on "Hide online status".

Suppose you visit your dream places and you take lots of pics, you want to share them with your friends in WhatsApp, but you can not send more than 10 pics at a sending time. There you need GBWA in which you are able to send more than 10 pics at a sending time.

Customized emojis are amazing for mod GB users. you get new and customized emojis, available for GB WA users only

WA is improving itself by adding new features one of them is stickers. This is feature is not only available on the ordinary version but also on the MOD version. Add as many stickers in GBWhatsApp as you want.

Change the icon of the app in the menu as well as in the notify-bar.

Auto-reply is a cool feature of WhatsApp limited to the WA business app. Get the same feature in this MOD version. By this option, whether you are online or offline, you are able to send an auto-reply to a message sender. Simply set a message in the option which is set as an auto-reply. Be a developer, create and use your own theme for this app. There are many users who developed a lot of themes to help others and make the platform better and easy to use for every user.

One of my favorite features of GB WhatsApp is long video status. You can not upload a video in WA longer than 30 seconds, which is limited to 7 minutes in GBWhatsApp APK.

Keep your app safe, enable passwords in it.

When someone sends a video, you can play in the default inbuilt video player of WhatsApp, a common player does not have many features like all those third-party video players have. You can choose a third party video player to play video in GBWA APK.

Bugs fixes

Before I start telling you the advantages of the GBWhatsApp APK, I am supposed to let you know what GBWA APK is. GBWA is nothing but a modified version of WhatsApp. As you know WhatsApp is a very popular chatting app for smartphone users, this is available for all the platforms including Android, iOS, Java OS and more. WA provides some amazing features that other chatting apps similar to WA could not provide so. To take more advantages of this cool app, some developers modified this app and turned it into MOD versions. GBWhatsApp APK is one of them. To use this app you are able to use dual Whatsapp, get all those displayed features.

You can not find the GBWhatsApp MOD version on Google Play, so you need to download it from the site and then install it manually. If you do not know how to install GB WhatsApp on your Android you may follow this installation guide. To install an APK file into the operating system of your Android, you may need to turn on the 'Unknown sources', located in settings>security>unknown sources. Then just follow these steps with images as shown below.

Download the latest version of GBWhatsapp APK from this site just clicking the download button, located below. Once you have downloaded the APK file tap the file and tap install it.

The installation process takes a few seconds only, depends up to the device. Once it is successfully done, open it and enjoy GBWhatsApp latest version APK.
