Description

Grow CRM V1.09 Laravel Project Management Free Download

Grow is a client relationship management application, with full project management features. Grow combines many of the various tools that you require, in one easy to use application. These include task, invoices, leads, estimates and much more.

CRM Features

We have given attention to every design element. The final result is what we believe to be an extremely user-friendly application. The application gives you and your clients a single point of contact, to collaborate on projects.

Project Management

You no longer need to use multiple tools to get the job done. The application comes with very advanced features to help you manage your projects. Make your life even easier by taking advantage of the project templates feature and also the project cloning feature.

Task Management

Get the job done by making sure you complete your tasks on time. Use the applications advanced features such as task cloning, task timers, task reminders and many more, to make your work easier and more efficient. You can assign tasks to your team members and also to your clients.

Time Tracking

Keep track of the amount of time that you spend on your projects, The CRM comes with a full featured time tracking solution. You can start and stop your timer, or you can manually record the time spent working on a task. You can then easily bill your clients for the time recorded.

Invoices & Payments

We have created a very easy to use invoicing system. There is now no need for you to use a third part invoicing application. The CRM enables you to create invoices with many options, such as, time billing, product billing, task billing etc. Your clients are automatically sent their invoice via email and they can easily pay for it via credit card or PayPal.

Subscriptions

This feature enables you to bill your clients for your products and services, automatically. You can set the billing cycle to weekly, monthly, yearly etc. The system will automatically generate a new invoice and charge your client's credit card automatically

Estimates/Quotations

Clients are more willing to commit to a project when they have an idea of the total cost. The application comes with a very easy to use tool for you to create and email estimates to your customers. Your customer can then review and accept your estimates very easily.

Proposals

First impressions count. Impress your prospective clients with beautifully crafted project proposals. No design skills required, with our easy to use interface.

Recurring Billing

You can create daily, weekly, monthly or even yearly recurring invoices. The system will automatically create a new invoice and email it to your client.

Leads & Opportunities

Keep track of your opportunities and nurture your leads into paying customers. You can easily capture new leads, using our very advanced form builder. You can then embed your lead capturing forms on any website.

Knowledgebase

Lower your customer support time by offering your customers access to a self-service information and help repository. You can even create a video knowledge base, by using the YouTube video gallery feature of the knowledgebase.
