#### Frequently Asked Questions

Is it possible to install Grupo Chat on shared hosting platforms like GoDaddy or Bluehost?

Yes, you can install Grupo Chat on shared hosting. The software is compatible with most current web servers, including Shared, Cloud, VPS, and Dedicated servers that have PHP and MySQL installed.

How can I install the Grupo Chat System on my server?

Installing Grupo is an easy process. Simply decompress the contents of the zip file you downloaded from CodeCanyon, upload the entire "chatscript" folder to your desired location on the web server, and then run the installation System by accessing the URL in a web browser. For

more detailed installation instructions, you can visit: <https://docs.grupochat.co/installation/>

Do you offer installation services for Grupo?

Yes, we do provide free installation services for Grupo. After purchasing Grupo, simply reach out to our support team at This email address is being protected from spambots. You need JavaScript enabled to view it.

```
document.getElementById('cloak3e906c6d53227398a51043a5627954a6').innerHTML = ''; var prefix = 'ma' + 'il' + 'to'; var path = 'hr' + 'ef' + '='; var addy3e906c6d53227398a51043a5627954a6 = 'hello' + '@'; addy3e906c6d53227398a51043a5627954a6 = addy3e906c6d53227398a51043a5627954a6 + 'baevox' + '.' + 'com'; var addy_text3e906c6d53227398a51043a5627954a6 = 'hello' + '@' + 'baevox' + '.' + 'com'; document.getElementById('cloak3e906c6d53227398a51043a5627954a6').innerHTML += "+addy_text3e906c6d53227398a51043a5627954a6+";
```

.. and they will assist you with the installation process.

Do I need Extended License for enabling Wallet & Membership System ?

You'll need an Extended License if your end users have to pay to use the end product. In other words, if you intend to charge your end users, owning an Extended License is necessary.

What are the available payment methods?

Available Payment Methods : Stripe, Paypal, Coinbase, Flutterwave, Toyibpay, lyzico, Xendit, Nowpayments, Paysera, aamarPay, Viva.com, Paymentwall, PayTR, Razorpay, Bank Transfer – In the future, more options will be added.

Is it possible to integrate with my WordPress website?

The bundled Grupo WordPress plugin enables easy integration between your WordPress website and Grupo. It supports single sign-on functionality, allowing users to log in through WordPress and access Grupo without the need for separate authentication

Can I integrate the Grupo Chat System into my existing website to provide a seamless experience for my users, avoiding the necessity for them to log in or register multiple times?

Yes, it is possible to integrate the Grupo Chat System into your existing website and achieve a seamless user experience with Single Sign-On (SSO). You can utilize the Grupo API for SSO requests. Please check the following link: [API Request Documentation](#).

Is the payment for this product a one-time fee, or are there recurring charges involved?

Indeed, you'll only need to make a one-time payment for the Grupo Chat PHP System. The package encompasses 6 months of support, the complete source code, and you'll also benefit from lifetime updates without any extra charges.

How can I get in touch with the Grupo Chat support team?

We are here to provide assistance in any way we can. We value your feedback and are available to address any inquiries you might have.

Auto Remove Images that contain Partial Nudity, Explicit Nudity, Weapons, Alcohol, Drugs, Offensive Signs, Graphic Violence & Gore using Google Cloud Vision & SightEngine.

### AI-Powered Text Moderation

Auto identify and remove text content that may be abusive, offensive, or harassing using Perspective API.

### Link Filter

Block users from posting URLs that you've identified as undesirable or potentially harmful. Say goodbye to spam, malicious links, and inappropriate content, and keep your online community safe and focused on meaningful discussions.

### Site Roles

Site Roles Module allows you to enable or disable site user features and permissions. Just select/deselect the check boxes of capabilities you wish to add/remove to the selected role and click "Update" button to save your changes. You can even create custom site roles.

### Group Roles

Group Roles Module allows you to enable or disable group member features and permissions. Just select/deselect the check boxes of capabilities you wish to add/remove to the selected group role and click "Update" button to save your changes. You can even create custom group roles.

### Dark Mode & Light Mode

Mode Switcher allows you to change the color theme of Grupo from white to black or black to white. The darker tones are more relaxing for user's eyes to take in, especially in low light, and don't draw as much power as brighter colors.

### Facebook Like Reactions

This let Users to react to user messages. Let your website users engage by giving them the opportunity to react user messages.

### Friends Feature

With the friends extension you can increase user interaction on your site by allowing users to become friends by sending & accepting/rejecting friend requests

### People Nearby Feature

Allows people on a your website to search for other users within a certain distance relative to their own location.

### Fake Online Users

The "Fake Online Users" feature enables you to set your current site users' online status to always appear online. To achieve this, navigate to the menu, select Site Users, choose Fake Online Users, click the plus sign, and select the user you want to display as always online.

### Email Validators

Provide an option to block email addresses from certain domains or allow email addresses only from certain domains. Helps you to eliminate disposable, fake email addresses.

### Language Manager(Multi-Language Support)

Grupo allows you to create easily a multilingual website, without having to install any third party extension. Translate your site in multiple languages in the easiest way.

### Push Notifications

Web push notifications are notifications that can be sent to a user even if the user is offline. These are alert style messages that slide in at the top or bottom right hand corner of a desktop screen, depending on the operating system; or appear on a mobile device in a manner nearly identical to push notifications delivered from apps.

Web Push notifications are sent :

When a user sends a Private Message to an another user (offline)

When a user mentions another user in Group Chat

When a user replies to the another user messages (Group Chat)

### Progressive Web App

Progressive Web Apps provide an installable, app-like experience on desktop and mobile that are built and delivered directly via the web.

Progressive Web Apps (PWAs) are web applications that are regular web pages or websites, but can appear to the user like traditional applications or native mobile applications. The application type attempts to combine features offered by most modern browsers with the benefits of a mobile experience.

### Message Scheduler

Allows you to schedule a message to be sent at a specific time in the future. With this feature, you can compose a message, select the desired date and time, and the message will be automatically sent at the specified time.

### Mobile Number Verification via OTP

Mobile Number Verification via OTP is a secure way to ensure that a user's mobile number is valid. This method can help prevent fraudulent activities, such as creating fake accounts.

### Adblock Detector

An Adblock Detector is a feature that detects whether a user is running ad-blocking software or extensions in their web browser. It is designed to detect when a user is blocking ads on a website and prompt them to disable their ad-blocker or whitelist the website.

### IP Intelligence

IP Intelligence is a service that determines how likely an IP address is a proxy / VPN / bad IP using advanced mathematical and modern computing techniques.

### Ad Slots

Ad slots helps you to place advertisements or html content in Grupo.

### Stickers

This feature allows users to send different stickers while chatting just like other instant messaging apps. You can add or manage stickers via Grupo Panel.

### Social Login

Social Login is single sign-on for end users. Using existing login information from a social network provider like Facebook, Twitter, or Google, the user can sign into a Grupo Chat instead of creating a new account. This simplifies registrations and logins for end users. Grupo Chat is integrated with more than 40 providers.

### Audio Player

This feature helps to let your users to start listening to the radio/playlist you've added for them. To add radio stations, you just need to add their stream links.

### Language Manager(Multi-Language Support)

Grupo allows you to create easily a multilingual website, without having to install any third party extension. Translate your site in multiple languages in the easiest way.

### Support RTL languages

Grupo supports RTL languages (Arabic,Hebrew,Persian,etc) and keeps the same layout and HTML structure as the original version of your website in the translated versions.

### File Previews

Preview image files and videos right in your browser, without having to download the files and then open them in a different application!

### Link Previews

Link previews are generated by fetching the URL and parsing meta tags of the page for title and description and image tags for thumbnails.

### Voice Messaging

Sometimes we are too tired to text type messages, that's the time we can send voice messages by recording our texts. Grupo allows to send voice messages to individual or group chat.

### Auto Group Join

Auto-Join Group feature allows you to automatically join new Grupo members to Group(s) of your choice.

### Pin Group

A pinned group is a group that you manually select to stay at the top of the Group list, meaning it will not slip down the list as you continue to add other groups.

### Guest Login

Allows non members to login & join online chat rooms without account registration.

### Send Tenor GIFs

Search and share the best and most popular animated GIFs to group or individual conversations.

### File Storage

Lets the Grupo site users to upload files. Each file is saved in private directory so each user can download/delete/share their own files after login.

### Flood Control

When one chat user sends too many messages at one time, either in group chat or in private message, Flooding occurs. Grupo has a Flood Control feature that automatically ignores a user when flooding occurs & prevents users from spamming the chat.

### Profanity Filter

A swear filter, also known as a profanity filter is a subsystem which modifies text to remove words deemed offensive by the administrator.

### Login as User

Allows admins to have easy access to the frontend as a specific user instantly to check data. With one click, the admin logs in as the external user and handles any situation without wasting any time at all.

### Block IP Addresses

If you have annoying visitors or spammers, you may find it useful to block these users from accessing your website content. You can block bad visitors by IP address or blocks of IP addresses. You can choose to block a range of IP addresses as well as blocking individual IP addresses.

### User Profile

User Profile is a component that allows you to profile users by using custom fields & show user informations,

### Group Info

This allows you to see group's informations & custom fields in the Group Info Screen

### Avatars

Grupo comes with 50+ built in avatars. Users can choose a avatar of their choice.

### User mentions

User mentions are a great way to include other users within your messages, and ensure that they know about your mention. Mentions work similarly to how they work on Twitter, where you use an "@" symbol, and then someone's username.

### Bulk File Uploads

Allow users to you to multiple files at once.

### Export Conversations

Users can easily export a particular conversation via Export Chat option

### Group Invitation

Users can invite people to join groups using their email address or usernames.

### Deny direct access to user uploaded files

Grupo protects from executing user uploaded php files as well as prevent Google, other search engines and unwanted users from indexing and stealing user files.

### Typing Indicator

When someone is writing to you, the Typing Indicator will appear. Allows your users to see when an someone is typing a reply back in an conversation.

### Prevent User Registrations

User Registrations can easily be disabled in Grupo, and without modifying any source code.

### Emoji Picker

Users can insert emojis in their messages. Include more than 2,000 emojis.

### Gravatars

Gravatar stands for Globally Recognized Avatar. It is globally recognized because millions of people and websites use them. Most popular applications like WordPress have built-in support for Gravatar. Grupo supports Gravatar, it pulls users Globally Recognized Avatar from Gravatar servers.

### Custom Fields (Group/Profile)

You can create custom profile or group fields.

### Short Text

### Long Text

### Date Field

### Number Field

### Drop Down Field

### Ban User Accounts

Allows admins to blocks user accounts and prevents users from accessing the chatroom or website.

### Long Polling

As in regular polling, rather than having to repeat this process multiple times for every client until new data for a given client becomes available, Long polling is technique where the server elects to hold a client connection open for as long as possible, delivering a response only after data becomes available or timeout threshold has been reached. After receiving response client immediately sends the next request.

### Cache System

The Cache System creates static files and stores them on the servers disk. The web server will deliver the static file and avoids the resource intensive backend processes.

### User Device Logs

User Device Log is a simple module that logs the IP address & device information of users on login event to table.

### Quoted Replies

Instead of hopping into a conversation and replying to a message that was sent earlier in the day without any context, a quoted reply makes it clear what you are talking about. As you can imagine, this will surely come in handy in a group conversation.

### Limit Excerpt Length (Read More)

Filters the maximum number of characters in a message excerpt. Default length is 300 Characters. Use this filter if you want to change the default excerpt length.

### Responsive Web design

Responsive web design (RWD) is an approach to web design that makes Grupo render well on a variety of devices and window or screen sizes.

### Add Menu Items

You can easily add or manage menu items from an easy to use interface inside your Grupo admin area.

### Customizer

Allows you to easily customize Grupo (background,text-color,font-size) straight from Grupo Customizer.

### Read receipts

Read receipts is the way by which the sender can tell or get to know whether the message is read by the receiver or not.

### Headers and Footers

Lets you insert code like Google Analytics, custom CSS, Facebook Pixel, and more to your Grupo site header and footer. No need to edit any core files.

### Complaints/Spam reporting

Complaints are reports made by users against messages/groups which they believe is spam or abuse.

### Profile Deactivation

Users can deactivate their account temporarily and choose to come back whenever they want.

### Limit Login Attempts

Limit the number of retry attempts when logging in (per each IP). This protect your site from brute force attacks.

### Role Color

Role Color lets you to set a custom color for each Site Role.

### Boxed or Full Width Layout

There are 2 layout types available in Grupo, Boxed & Full Width Layout. You can switch between these layouts with Grupo Customizer.

### Grupo Cron Jobs

Grupo Cron Jobs allows you to create time-based tasks in Grupo. Grupo core includes features such as auto delete messages, auto delete users, etc.

### Drag and Drop File Uploading

Allowing users for drag and drop file upload alongside the traditional file input.

### Custom Background

Allows your users to set their own custom background image for their page. It allows them to upload a new image and sets it as their background image.

### Invite Non Members to Group Chat

Users can invite non site members to join groups using their email address.

### Block Posting URLs

You can block users from sharing URLs.

### Invite using Group Links

Users can invite others to their groups by sharing a special link with them.

### Send Screenshots

Users can easily share your screenshots with other people. Pressing PRINT SCREEN captures an image of your entire screen and copies it to the Clipboard in your computer's memory. You can then share (CTRL+V) your screenshots with other people in a conversation.

### Hide languages

Admins can hide languages. Go to languages & select language that you would like to hide.

### Alerts or Notifications

Alerts are used when the system wants to notify the user about some status or other event.

### Limit Records per load

Admins can specify the number of records to return on loading list or messages.

### Infinite Scrolling

Infinite scrolling is a web-design technique that loads content continuously as the user scrolls down the page, eliminating the need for pagination.

### Custom CSS

Custom CSS is part of the Customizer which allows to add any Custom CSS code to your website without any hassles.

### Embed Group Chat

Embed your chat or group on your website or blog via an iframe with just a few lines of code.

### Grupo Booster

Our Booster speed up your Grupo performance by using Cache, CSS, JavaScript, etc.

### Auto-rotate pictures

Ever wonder why some photos look correct in some programs, but appear sideways or upside down in others? This feature read Exif data labeled Orientation and automatically rotates the image to the proper orientation

### Email Verification

This feature verifies the email address of user by sending the verification link to the email of a user at registration time.

### Profile Cover Photo

Users can set an image as their profile cover. A cover photo is the larger photo at the top of your profile, right above your profile picture.

### Group Cover Photo

Admins can set an image as their group cover. A cover photo is the larger photo at the top of Group info, right above group picture.
