How to Upgrade

Grupo Chat Features

Easy Installer

Grupo is integrated with easy Installer. Just provide the database details & Purchase Code, easy installer will do the rest for you.

Groups/Rooms

Create unlimited groups or rooms and invite people by email or username.

Public Group

Password Protected Group

Secret/Hidden Group

Unleavable Group

### Admins or Moderator only Group

#### One to One Chat or Private Messaging

Your users will love it because Grupo allows them to chat one-on-one. When users can talk to one another, your product engagement is higher.

### Dark Mode & Light Mode

Mode Switcher allows you to change the color theme of WhatsApp from white to black or black to white. The darker tones are more relaxing for user's eyes to take in, especially in low light, and don't draw as much power as brighter colors.

### Progressive Web App

Progressive Web Apps provide an installable, app-like experience on desktop and mobile that are built and delivered directly via the web. Progressive Web Apps (PWAs) are web applications that are regular web pages or websites, but can appear to the user like traditional applications or native mobile applications. The application type attempts to combine features offered by most modern browsers with the benefits of a mobile experience.

### Ad Slots

Ad slots helps you to place advertisements or html content in Grupo. You can place content in the following locations :

#### Left Side

#### Right Side

#### Welcome Window

#### Advert As Chat Message

#### Signin Page Top

#### Signin Page Bottom

#### Stickers

This feature allows users to send different stickers while chatting just like other instant messaging apps. You can add or manage stickers via Grupo Panel.

### Social Login

Social Login is single sign-on for end users. Using existing login information from a social network provider like Facebook, Twitter, or Google, the user can sign into a Grupo Pro instead of creating a new account. This simplifies registrations and logins for end users. Grupo Pro is integrated with more than 40 providers.

### Grupo Connect (API)

Grupo API helps you to integrate Grupo Pro with your existing website or script. You can create user, create login link, create group, join/add user to group using CURL request.

### Radio Player

This feature helps to let your users to start listening to the radio you've added for them. To add radio stations, you just need to add their stream links.

### Language Manager(Multi-Language Support)

Grupo allows you to create easily a multilingual website, without having to install any third party extension. Translate your site in multiple languages in the easiest way.

### Support RTL languages

Grupo supports RTL languages (Arabic,Hebrew,Persian,etc) and keeps the same layout and HTML structure as the original version of your website in the translated versions.

### User Roles

User Role Manager allows you to change user roles and capabilities easy. Just turn on check boxes of capabilities you wish to add to the selected role and click "Update" button to save your changes.

### File Previews

Preview image files and videos right in your browser, without having to download the files and then open them in a different application!

### Link Previews

Link previews are generated by fetching the URL and parsing meta tags of the page for title and description and image tags for thumbnails.

### Voice Messaging

Sometimes we are too tired to text type messages, that's the time we can send voice messages by recording our texts. Grupo allows to send voice messages to individual or group chat.

### Auto Group Join

Auto-Join Group feature allows you to automatically join new Grupo members to Group of your choice.

### Pin Group

A pinned group is a group that you manually select to stay at the top of the Group list, meaning it will not slip down the list as you continue to add other groups.

### Guest Login

Allows non members to login & join online chat rooms without account registration.

### Send Tenor GIFs

Search and share the best and most popular animated GIFs to group or individual conversations.

### Filemanager

Lets the Grupo site users to upload files. Each file is saved in private directory so each user can download/delete/share their own files after login.

### Flood Control

When one chat user sends too many messages at one time, either in group chat or in private message, Flooding occurs. Grupo has a Flood Control feature that automatically ignores a user when flooding occurs & prevents users from spamming the chat.

### Profanity Filter

A swear filter, also known as a profanity filter is a subsystem which modifies text to remove words deemed offensive by the administrator.

### Login as User

Allows admins to have easy access to the frontend as a specific user instantly to check data. With one click, the admin logs in as the external user and handles any situation without wasting any time at all.

### Block IP Addresses

If you have annoying visitors or spammers, you may find it useful to block these users from accessing your website content. You can block bad visitors by IP address or blocks of IP addresses. You can choose to block a range of IP addresses as well as blocking individual IP addresses.

### User Profile

User Profile is a component that allows you to profile users by using custom fields & show user informations,

### Group Info

This allows you to see group's informations & custom fields in the Group Info Screen

### Avatars

Grupo comes with 50+ built in avatars. Users can choose a avatar of their choice.

### Like System

This let Users to like user messages. Let your website users engage by giving them the opportunity to react user messages.

### Auto Delete Group Messages

This feature will automatically delete the group messages after a specified time interval.

### Auto Delete Users

This feature will automatically delete the users after a specified time interval.

### Auto Unjoin Groups

This feature will automatically unjoin the users from all the groups after a specified time interval.

### User mentions

User mentions are a great way to include other users within your messages, and ensure that they know about your mention. Mentions work similarly to how they work on Twitter, where you use an "@" symbol, and then someone's username.

### Bulk File Uploads

Allow users to you to multiple files at once.

### Export Conversations

Users can easily export a particular conversation via Export Chat option

### Group Invitation

Users can invite people to join groups using their email address or usernames.

### Play YouTube, Dailymotion, Vimeo videos

Allow users to play YouTube, Dailymotion, Vimeo videos within the chat screen

### Deny direct access to user uploaded files

Prevent Direct Access provides a solution to protect from executing user uploaded php files as well as prevent Google, other search engines and unwanted users from indexing and stealing user files.

### Email Notifications

This features allows users to receive email notifications of Grupo activities.

### Typing Indicator

When someone is writing to you, the Typing Indicator will appear. Allows your users to see when an someone is typing a reply back in an conversation.

### Group Filtering

Allows users to filter joined & unjoined groups.

### Prevent User Registrations

User Registrations can easily be disabled in Grupo, and without modifying any source code.

### Auto Release Guest Usernames

This feature automatically updates the guest username with a random username when a guest user logout.

### Generate Random Guest Username

This feature automatically generate a guest username if the submitted guest username is unavailable.

### Emoji Picker

Users can insert emojis in their messages. Include more than 2,000 emojis.

### Gravatars

Gravatar stands for Globally Recognized Avatar. It is globally recognized because millions of people and websites use them. Most popular applications like WordPress have built-in support for Gravatar. Grupo supports Gravatar, it pulls users Globally Recognized Avatar from Gravatar servers.

### ASCII to Emoji Convertor

Allows to convert ASCII Smileys to equivalent Unicode emojis

### Custom Fields (Group/Profile)

Admins can create custom profile or group info fields. Custom profile fields are always optional, and do not appear in Users Pprofiles or Group Info until they fill them out.

### Short Text

### Long Text

### Date Field

### Number Field

### Drop Down Field

### Show Custom fields on Signup form

Custom User Field inputs can be added to signup form. The data entered into these inputs will be displayed on user profile.

### Draggable Preview Box

Users can move the preview box by clicking on it with the mouse and dragging it anywhere within the viewport.

### Ban User Accounts

Allows admins to blocks user accounts and prevents users from accessing the chatroom or website.

### Long Polling (Ajax Timeout)

As in regular polling, rather than having to repeat this process multiple times for every client until new data for a given client becomes available, Long polling is technique where the server elects to hold a client connection open for as long as possible, delivering a response only after data becomes available or timeout threshold has been reached. After receiving response client immediately sends the next request.

### Cache System

The Cache System creates static files and stores them on the servers disk. The web server will deliver the static file and avoids the resource intensive backend processes.

### User Device Logs

User Device Log is a simple module that logs the IP address & device information of users on login event to table.

### Quoted Replies

Instead of hopping into a conversation and replying to a message that was sent earlier in the day without any context, a quoted reply makes it clear what you are talking about. As you can imagine, this will surely come in handy in a group conversation.

### Easy Customizer

Allows easily customize the layout. Allows you to manage a site-wide central color palette for an uniform look & feel.

### Limit Excerpt Length (Read More)

Filters the maximum number of characters in a message excerpt. Default length is 300 Characters. Use this filter if you want to change the default excerpt length.

### Responsive Web design

Responsive web design (RWD) is an approach to web design that makes Grupo render well on a variety of devices and window or screen sizes.

### Add Menu Items

You can easily add or manage menu items from an easy to use interface inside your Grupo admin area.
