Description

Google Structured Data Free V5.0.2 - Markup for Google on Joomla

Google Structured Data is a powerful snippet creation tool for Google. The new version improves standard functions and fixes previously known bugs.

Google Structured Data Markup will allow you to display the logo and site name in search results, as well as customize and display the search field in the snippet. It easily integrates with such popular Joomla extensions as: K2, Virtuemart, Hikashop, K2Store and others.

With the help of this plugin, your website will be more relevant and accessible for relevant queries. Always be in the top of Google search queries!

Stand out in search and drive more traffic
