Description

Hide Category by User Role for Woocommerce V2.0.2 WP Plugin Free Download

This plugin allows you to easily hide WooCommerce categories based on User Role.

You can also choose to redirect users to a URL or display a custom message when they attempt to access a hidden category or its related products.

This plugin has been tested with the most recognized user role management plugins.

How to install this plugin:

Install the plugin through the WordPress admin interface, or upload the plugin folder to /wp-content/plugins/ using FTP.

Activate the plugin through the 'Plugins' screen in WordPress. On a Multisite you can either network activate it or let users activate it individually.

Go to WordPress Admin > Hide Category by User Role for WooCommerce
