Description

H&R Malaysia Sdn Bhd Vector Logo Free Download

H&R Malaysia is located in the busy harbor area of Port Klang, logistically ideally situated to serve as a manufacturing and supply point to the Malayan market, but also as logistical hub for our Asia Pacific sales organization, due to its situation in the trade free zone.

H&R Malaysia markets the whole range of H&R specialties for the exception of wax emulsions which are manufactured and sold by our sister company H&R Wax Malaysia. The primary focus is on label free process oils which are extensively used in the rubber industry as processing aids and extenders for rubber; and on supplying the major tire manufacturers in the region. Other important industries are the printing ink, the chemical and the pharmaceutical and cosmetics industry.
