### Description

InfixBiz V3.3.4 Open Source Business Management ERP Free Download

Reliability is the key factor when it comes to running a Business Management ERP. Any lag or disturbance can affect your reputation. And we completely understand this responsibility from our experience in working in this field. We know every nitty-gritty detail of this respected industry.

### Feature Overview

- Responsive Layout Design:

Whatever you are using the device your site will run as it should be. The Business ERP is a fully responsive layout for all types of devices.

- Touch Friendly:

Browse easily on your smart device. Huge enough buttons, balanced typography, and responsiveness give you a desktop-like browsing experience.

- UX ready:

We have created a Property template with a strong focus on UX in every detail. All element is designed to work well on any popular device.
