InMillion Web Traffic Bot Visit Generator Free Download

InMillion Web Traffic Generator V2.9

Why InMillion Web Traffic Generator?

This application allows you to send millions of visits to your websites in a single click, with an ability to customize visits with a huge variety of options like: Browser, Operating System, Device, Version, GEO Location and so many more.

NOTE: this software is to improve your website SEO, enhance your pages' rank, save your time, efforts and money, not for advertisers or CPC/CPA websites. You can use it to improve your website rank, or sell traffic to your customers.

We Guarantee the traffic is fully safe and efficient with: major Consoles, Bing, Google, Google Analytics, Matomo, Ahrefs, Alexa, MixPanel or any Search Engine, Analytics or Ranking platforms.

It is Fully Safe to send traffic to any website operates an AdSense or any other ads platform but without External clicks. Please read this article to learn more.

We do not support sending fake clicks to any CPC website, and we will never improve it to do that.

So what's the use of "Exclude/Include externals" option if you do not encourage external ads clicks?

This option is one of the most powerful features that increases backlinks for either yours or your clients' website because it sends unlimited clicks to any backlink on your website. If you don't know how backlinks affect SERPs and keywords, google it.

Ability to add unlimited IP/Proxy from Your Own Resources.

Checking proxies before sending with timeout setting:

Auto deactivate expired proxies

Ability to export clean ones to a text file.

Major Social networks and websites referral are included.

Ability to add your own referral websites.

Control Organic and/or Direct sending for each URL.

Send up to 1Million visit in a single job.

Add up to 1000 URL for each job.

Fetch all site URLs in a single click.

Send visits to many website at the same time.

Ability to control quantity for each URL with Referral/SEO or/and Direct sending

Distribute quantities between SEO/Referral and Direct visits with a fixed or random percentage.

Set the visit duration with fixed or random values

Auto Setting priority for devices: Computer, Mobile, Other Devices (Screens, Car, Server, Game Console) and more.

10,000+ user agents included, which means:

InMillion Web Traffic Bot Visit Generator - 100% friendly, safe and counted with Google Analytics, Webmaster consoles, Matomo or any other software.

Using Google Selenium power security.

Auto detect and change engine driver according to your chrome version

Frequently free updates with a single click:

You can update your software directly from within it, you don't need to download a new package and install it.

Just click Update button and you'll see a confirmation message to update if there's a new release available.

Any additional feature could be added

If you are a freelancer and you recommend another feature to be included please contact us with your suggestion and we'll add it to the software in the next releases if it's helpful.
