Description

Investment Migration Council Vector Logo Free Download

The Investment Migration Council (IMC), based in Geneva, Switzerland, was founded in 2014 as a not-for-profit organisation. The Council's mission is to set standards in the investment migration industry worldwide. The IMC supports and interacts with other associations, governments and international organisations in the investment migration field. In addition, the Council supports the industry in improving the public understanding on investment migration, which is a new industry and seen by some as controversial, through education and its code of ethics and professional conduct.

The IMC is the organiser of the annual, Investment Migration Forum. The Forum brings together over 300 participants from representatives of international organisations to government officials, and academics. Attendees from 40 plus countries share their views and their ideas, over a three-day period, through roundtable- and panel-discussions.
