Description

Landa v1.0 – Driving School Management System PHP Script Free Download. Landa is a Driving School Management Software crafted just to Solve that Problem. Landa Handles almost all Tasks done Daily by Driving schools. Most Driving Schools around the world still use Physical books to Schedule Classes and keeps Records. This Method is Outdated, Unreliable, not Readily Accessible and Sometimes inaccurate.

Landa is a Driving School management system crafted just to solve that problem. Landa is a complete driving school management system that handles almost all tasks done daily by driving schools. Below is a list of the features of Landa.

Features

Scheduling: Class scheduling is an important part of every driving school. Landa allows schools to create class schedules and monitor them. This features helps prevents double booking of time slots and has a beautiful calendar to display all classes. Also an SMS is sent to students when they are booked in for a class.

Student Management: Keep all your student records in a way that you can access them from anywhere. You can search through them easily and be able to check all the details of a specific student.

Online Learning Portal: Create an online curriculum and provide learning resources for your students to learn online from anywhere with any device..

Online Examination: Create an online exam for your driving school students to take and get results instantly online.

Notes and attachments: You can create and upload notes on a profile of a students, staff or instructor.

Instructors: Instructors of courses will also have accounts where they can login and check their schedule.

Branches: Most driving schools have branches and that is covered on Landa. Create as many branches of your driving school as you want and manage them easily.

Stats dashboard: Landa driving school management system comes with a stunning dashboard that shows you the important statistics of your school.

Invoice Management: When a student account is created and they sign up for a course. An invoice is created and sent to them. You can keep track of all your invoices and see pending balances. You can download, edit and add payments to invoices as well

Payments: Keep a record of all the payments you receive for future reference as well as update the invoice automatically.

Reminders: Send reminder of late payments and also reminders of upcoming classes to students

Fleets: Keep a record of all your fleet for easy assignment as well as check it's schedule.

Notifications Landa saves and shows notifications of important activities of your driving school.

Communications: This features allows driving schools to send SMS or Email to their students, staff, instructors or all users on the system by a click of a button. The history of the messages is kept for future reference.

Courses: here you keep a list of your courses with it's details like price, number of classes, instructors etc. This list is used when signing up new students to you driving school.

Staff: The staff module allows driving schools to create accounts for their employees where they can manage daily operations of the school

Multi user: You can build a saas software with Landa since it supports multiple school accounts.

Beautiful and responsive UI: Landa was made with love and passion that's why it looks stunning.

Fast processing speed: Landa is faster with clean code written on PHP with MVC model.
