LDMS V 1.3 - Document Validity Manager - CodeCanyon Item for Sale

LDMS is a document validity management tool. It helps you set alarm/reminder for the renewal of all of your important documents like commercial licenses, insurances, passports, visas, personal licenses, subscriptions and so on. You will get notified about their expiry through email. Now that you won't be missing out on any important expiry dates, you also won't be paying any fines, extra charges for delay, basically no more consequences that come from missed expiry dates!Whether you are an individual or a corporate entity, it offers the same flexibility to cater for your needs.
