### Description

MeetUp - Joomla Template Free Download

MeetUp V2.0.0, The theme of this pattern has to ensure that it was installed on sites, which represent the carrying out of all kinds of presentations and conferences. TemPlaza MeetUp has a complete set of functions, which facilitate the organizers of the event, the calculations of the number of guests.

Naturally, the site template of this type should by all means encourage the user to visit a particular event. This Joomla template is a landing page, which is quite convenient for the lighting of any planned activities. The home screen greets the user a fullscreen slider where can be placed the name of your event, and is counting before it starts. The main buttons with the registration and more information about the event are also located on the slider. Menu template vertical and attached to the top edge of the screen, regardless of how hard you went down on the page. Each information block has its own specifics. In them you will be able to upload videos, photos, as well as post motivational texts. In some blocks duplicated the registration button on the floodlit event. In the block with the alleged dates of the conference interesting animated buttons, on which the information on the dates of the event. Conveniently, within the individual tabs with the date you will be able beautiful and interesting to paint the whole course of the conference by the hour. Of course, at the end of this landing page a user will wait for a detailed registration form. After all, if he scrolled to the bottom of the page, it means that the conference he was interested.

Templates TemPlaza differ in that have a well-honed functionality for a specific task. This means that by installing such a template to your site, you will not regret it, and will interest visitors.
