Description

Microsoft Office Mobile V16.0.14827.20124 Android Mobile App

Microsoft Office Mobile is a tool for Android that allows you to access, view, and edit Microsoft Word, Excel, and PowerPoint documents. Documents will appear just like they would on a desktop, thanks to full compatibility with graphs, animations, shapes, and SmartArt graphics.

Of course, in order to use the application you'll need to be subscribed to the Office 365 service. That means owning a subscription to one of the following packages: Office 365 Home Premium, Office 365 Small Business Premium, Office 365 Midsize Business, Office 365 E3 or E4 (enterprise), Office 365 Educational Environment A3 or A4, Office 365 ProPlus, or Office 365 University.

Thanks to a permanent connection to the Internet, Office Mobile gives you the ability to access all of your documents no matter where you are or what time of day it is. You can also apply changes directly to the cloud, and later go back to working on the document once you're in front of your computer.

Office Mobile for Office 365 is a useful application for anyone already using Office 365. You're sure to want to take advantage of the opportunities that this app has to offer.
