FAQs of Mortal Kombat X APK.

Q1. Connection Error Problem: Failed to Get Online Profile

If you are receiving the error "Connection Error: Failed to Get Online Profile. Would You Like to Retry or Continue With Your Current Offline Profile" please try the following:

First, try pressing "Retry" a few times. You may be able to connect normally if you try again. If this fails, try the following:

1. Click the Menu button
2. Select "Profile"
3. Select "Change WBID"
4. Click the "Don't have a WBPlay account?" button
5. Fill out the form with your existing WBID email address and password
6. Agree to the Privacy Policy and Terms of Service by checking the box for it
7. Click "Sign up using your email" again
8. You'll receive a message asking you if you would like to associate your save with this WBID, select Yes
9. If you do not receive a success message, click "Sign up using your email" again and then Yes again when prompted.

If these steps do not work, you can resolve the issue by reinstalling the game and logging back into WBID but in doing so you may lose any save progress you have made while playing Offline.

Q2. How do I change my Profile name in MKX Mobile?

Your display name is how other players will identify you. You can change your display name by going to Menu > Profile > Change Profile name.

Q3. How do I create or restore a cloud save in MKX Mobile?

To create a Cloud save you will need to be logged into WBPlay/WBID via the Profile tab in-game. Once you are logged into WBPlay, your Cloud save will be updated every time you play a match or perform another major action in the game.

To restore a Cloud save after reinstalling the game or installing it on a new device, simply log into the same WBPlay/WBID account you were previously using for the game. If a save is associated with that WBID you will be given the opportunity to download it again.

Please note that downloading a WBPlay save will erase the current save data on your device. Make sure that you do not mind losing Card Kollection you currently have on your device before attempting to download a Cloud save.
