Description

Offline Explorer Free Download

Offline Explorer V7.3.0.4551 provides everything for easy downloading: scheduling; proxy-server support; smart Web-browser integration; connection control (number of simultaneous connections, bandwidth limitations); and an internal dial-up that disconnects when it's finished or resumes broken connections.

Ultra-fast and smart downloading of Websites for later offline use. Powerful ease of usage. There's no other choice for saving desired Web content.

Offline Explorer for Windows 7 - A powerful utility for downloading websites to a hard drive, to subsequently view them without connecting to the network.
