### Description

Oman Drydock Company Vector Logo Free Download

Asyad Drydock is based at the Port of Duqm and strategically located close to global shipping routes benefitting customers by reducing deviation time. With a 2,800-meter quay, a water depth of 9-10 meters, 14 sets of jib cranes and two graving docks, the Dry Dock can handle vessels up to 600,000 DWT efficiently.

Commencing operations in 2011, Asyad Drydock initially specialised in handling LNG and VLCC vessels before expanding into gas carriers, car carriers, bulk carriers, pipe layers, heavy lift ships, cruise vessels and oil tankers. Asyad Drydock provides ship maintenance and conversion facilities for all types of vessels, offering a full range of general vessel repair services, including engineering, electrical, propulsion, accommodation upgrades, fittings, blasting and painting as well as procurement, testing, trials and class surveys.
