### Description

Video Copilot Optical Flares v1.3.5 Full Version Download

Optical Flares 1.3.5 Free Download VFX Plugin – Knowing this plugin means you're a video editor or visual effects artist who is already familiar with the term optical flare. A visual effect that displays dramatic lighting to make the scene look more diverse. It has many functions, such as highlighting effects, develop cinematic looks inside your film and much more. If you are a low budget videographer who hasn't been able to create flare effects manually with a lens, then have you tried using this after effects plugin?

Video Copilot provides a solution for you to design Optical Flares very easily. With this final plugin, you will be given several unique choices of flares. Even in this version, you will get their exclusive presets template for free. For example Optical Flares Pro Presets 1 and also Pro Presets 2. There are also several other templates that you must try it yourself. Moreover, its user interface looks simple and to the point. Where you just simply need to create a Solid Layer, then add effects manually from the effects menu. After that, Window Options will appear immediately, see the picture below. Do you want to try this plugin in your latest after effects software? Check the Video Copilot Optical Flares after effects free download full version link below v1.3.5 final, includes the latest crack.
