### Description

PUBG Mobile for Windows V1.8.0 is one of the most popular and adventurous survival games. With the Windows version, you can enjoy the game's action-packed, fast sequences on a large-sized screen. It's easy to get addicted to the game, especially with the unpredictable gameplay and strategy-based action sequences. In the Battle Royale game developed by Tencent Games, 100 players are pitted against each other, deserted on an island with several weapons and unorthodox items. Since there's a multiplayer mode, PUBG for Windows has become immensely popular among users around the world.

An action-packed survival game!

PUBG Mobile, or Playerunknown Battlegrounds, has been designed exclusively from the official mobile game. While you can enjoy the game on a larger screen, it replicates the maps, environments, challenges, weapons, and more. In this online multiplayer game, you can indulge in super intense, fast-paced action sequences.

There's also a Player vs Player shooter mode. Up to 100 players can battle to survive in a large-scale deathmatch. The last man remaining wins the game. Survival is the key in this strategy-based action-adventure. On a large screen, everything feels better, and you're able to have more fun. Compared to Grand Theft Auto V and Project IGI, this game is more engaging in the action gaming genre.

How to play PUBG Mobile?

When you start the game, an airplane drops all the players on a deserted island. The only way to get out of the island is to become the lone survivor. Since the game involves up to 100 players, it seems impossible to win the battle against such a huge number of participants. Unfortunately, the developers expect you to learn from experience, and you won't find any tutorials in the Windows version.

PUBG has always been known for its exciting and abundant maps. With different terrain and expansive routes, you need to build a solid strategy to survive. Throughout the game, you're vulnerable to attacks and need to use various weapons to keep yourself safe. While playing the game, you'll find plenty of abandoned houses, buildings, factories, and warehouses. In the huge maps, weapons can be found scattered in different locations. In fact, you can also leverage wearable armor, gear, and other items to inflict damage upon your enemies.

Does PUBG Mobile offer fast-paced action?

Compared to Call of Duty: Warzone and Call of Duty: Modern Warfare, PUBG Mobile comes with fast-paced action sequences. If you want to consider gameplay, it's worth mentioning that the mechanics and rules are straightforward. All you need to do is an attack, defend, defeat, and survive. Interestingly, there's a new threat at every step in the game. With enemies all around you, it becomes difficult to dodge silencers, snipers, monster trucks, and unorthodox disguises.

Like most battle royale games, PUBG Mobile comes with an ever-shrinking safe zone. If you venture outside this zone, it becomes even more

difficult to survive. It's worth mentioning that the playing zone gets smaller with every passing minute. It forces you to eventually face other players. As such, there's absolutely no use of hiding and missing the action. You need to be on your toes all the time, trying to kill your enemies.

While it's not bad to venture into the unknown, you need to be prepared for the worst. It's important to have a solid strategy to plan every movement. PUBG Mobile is an addictive, fun, and challenging game with fast-paced action. Though it's not easy to win, the adventurous ride is worth every minute you spend on the screen.

Is PUBG Mobile a good choice for Windows?

With the tremendous popularity of the game, it was only a matter of time until PUBG would be made available on multiple platforms. Tencent Games finally released PUBG for Windows, and it has been an excellent decision. PUBG Mobile even comes with an emulator, which allows users to replicate the Android screen on a Microsoft Windows computer. In order to make things interesting, you can use the emulator to play several other games, such as Auto Chess and Mobile Legends.

With PUBG Mobile, you don't have to worry about missing out on the latest events, versions, and updates. Even without a mobile device, every feature of the game will be accessible on your computer. Most importantly, PUBG for Windows lets you enjoy the game on a larger screen, which ensures better performance and more exciting gameplay. Since the controls are easy to use and simple, you won't have a hard time adjusting to the Windows PC.

With support for keyboard and mouse, the game feels faster and more accurate. Just like other FPS games, PUBG Mobile requires you to focus on smoother and flexible gameplay. While you may experience occasional lags on Windows PCs, it will still be a fun ride without any issue.

PUBG Mobile isn't a heavy-duty game and runs well on Windows PCs. Therefore, it doesn't affect system performance. If your Windows PC can play other FPS games without any issues, you wouldn't experience any problems with this one. Without a doubt, PUBG Mobile is an excellent choice for hardcore PUBG fans, and gamers interested in action and battle royale genres.

An amazing action game for Windows PCs!

Compared to other games in the action genre, PUBG Mobile offers a lot to fans, especially with the Windows version. On a large-sized screen, it's even more fun, exciting, and adventurous. Since the game tries to be creative at every step, you'll never feel bored or monotonous.

PUBG Mobile is available in multiple game modes and allows you to fight against several players in one go. One game mode even includes zombie attacks, which force you to plan strategies to defend yourself against the dead as well as the living. Throughout the game, PUBG keeps you at the edge of your seat, ensuring you have a roller-coaster ride.

### PROS

- Engaging gameplay
- Several customization options
- Multiple game modes
- Multiplayer option available

### CONS

- Occasional Lags
- No tutorials
