### Description

QuickPass V4.2 Visitor Management System Free Download

if you are searching for the best visitor management system application then iNiLabs Visitor management is the right choice for you. this app you can easily manage visitor registration and everything

iNiLabs – Visitor Pass Management System is a system for all kinds of company and business organizations. 2 Different types of SMS gateway available (Twilio and African SMS gateway), Users can register visitors, pre-register visitors, log visitor's check-in and check-out, employee's check-in and check-out and many more.

Visitor Management is one of the very important aspects of security management. It helps in capturing the details about the visitors in a systematic manner and maintains a repository of the same. Visitor Management is a process of allowing visitors to enter the premises based on appointment, creation of identification badges and managing the Security staff deployment for effective control over the security.

### PRINT BADGES

Beautiful sleek badges that create a safe and welcoming environment. Connect your printer and easily print any type of badge.

### SEND NOTIFICATIONS

Send visitors and hosts a friendly text or email reminder before their visit, at check-in and at check out.

### IMPRESS VISITORS

Create a welcome that stands out by allowing your visitors to sign themselves in, while you focus on giving them a warm personal greeting

### VISITOR MANAGEMENT

QuickPass makes managing visitor information a breeze. Your employees have access to the information they need, making visitor management smooth and easy.

### VISITOR RECOGNITION

Make your visitors feel truly welcome. Your visitor's name will be displayed on the screen as they check in and the app can remember details, like how they like their drink. They are not just any visitor

### SECURITY

Alert key people when a visitor checks in or forgets to check out, or just about a specific visit. Make visitors aware of safety and confidentiality rules, keeping your facilities and data safe.

#### DATA PROTECTION

Your data is safe with us. It is backed up daily across multiple servers, so you can have access to it even if there is a hardware issue. It is also yours to keep. You can, at any time, retrieve all your data.

#### REPORTS

Collect data and spot trends, produce reports and use surveys to gather feedback from your visitors. All this information can be used to help you improve the visitor experience.
