FFMPEG is required to post with an Unofficial API to post a video (required)
Twitter supports posting Tweets with API Official v2
Twitter supports posting Media/Text/Link (Official API)

1. Integrate scheduling easily

Save time and streamline your social media management by importing and scheduling multiple posts across various profiles and networks simultaneously. Plan ahead by queuing up posts in advance.

2. Optimize results

Streamline your content publishing process and improve your outcomes by leveraging scheduling and monitoring tools that automatically publish content during the times most likely to engage your audience.

3. Image and Video Library.

Simplify asset management and create visually engaging social media posts by using a centralized location to create, organize, edit, and publish your assets.

4. Multimedia Integrations

Add videos and images from platforms like Google Drive, Dropbox, One Drive and Adobe Express to your creative process in order to create visually engaging social media posts.

5. Additional account settings

Under the New Post tab in Settings, you'll find an option for Social Accounts. This is separate from the tab, where you'll find a lot of preferences related to how each account operates on its platform.

6. Preview Post

View the post before it is published on your social accounts. It is safer to preview your post and verify how your post looks on social platforms. You can edit or change the post as per your need after previewing.

7. Various Options for Media, Links and Text

There are several types of posts that can be created on Stackposts such as Images, Videos, Links and text.

8. Save and edit drafts

Keep your content ideas safe by saving drafts from the Composer whenever you want, enabling you to perfect and publish them later.

9. Save & Get Captions

Save your content with Captions Feature that you plan to use repetitively in your social media posts that you regularly use are particularly good to be saved as captions. Sometimes, you can organize your hashtags, and links and then get them when you compose a new post.

10. Photo Editor

Produce attention-grabbing, remarkable, shareable, and stunning images with Image Editor which is integrated with Adobe Express.

Upon initial image selection, you can edit and enhance your photo before publishing it to your selected network. Additionally, use the intelligent cropping tools to ensure optimal sizing based on network preference.

11. URL Shortener

Shortening URLs becomes essential when you have to share long and complicated web links on social media platforms that have character limitations.

12. OpenAI

It can be used to generate high-quality content for social media posts with captions.

13. Spintax

It's an ideal tool to create massive content. It could minimize the risk of account lockouts if social media platforms tag the messages as spam.

Dashboard

Clear and Concise Dashboard

It helps you to quickly and easily understand all your post reports on social media networks and make informed decisions for subsequent campaigns.

You can get the report for all accounts or each social account following a specific day or range of time.

Bulk upload multiple posts

Save time and effort by scheduling more than a hundred social media posts using Stackposts's Bulk Uploader in three easy steps.

Schedule Calendar

See all your scheduled posts in one place, and add or edit posts as needed.

Stackposts provides social media management tools and a content calendar, enabling easy management of your social media accounts. This includes scheduling, queuing, and bulk uploading posts, making it ideal for teams using quarterly or monthly content plans.

Account Manager

Save time on social media by connecting your accounts to Stackposts. With Stackposts, you can manage activity for all your linked accounts in

one place, removing the need to sign in to each social network individually.

Adding Facebook Profile/Page/Group with Official API

Adding Facebook Profile/Page/Group with Cookie

Adding Instagram Account with Official API

Adding Instagram Account with Username and Password (Unofficial API)

Twitter Official API with v2

File Manager

With the file manager, you can create and view the files/folders hierarchy and access a range of functions like uploading, moving, as well as deleting files, and folders.

You also get media from Dropbox, Google Drive and One Drive.

Search Images & Videos Online

Easily discover and download fitting images and videos for your posts on the Stackposts Platform with access to Unsplash, Pixabay and Pexels

Cloud Storage Integration

Unlock the power of seamless image, video, and file management with our cutting-edge cloud storage integration.

Elevate your experience on the Stackposts Platform by effortlessly storing and retrieving your multimedia assets through renowned cloud services like Amazon S3 and Contabo.

Embrace convenience and efficiency as you harness the full potential of our integrated solutions for your social media content needs.

Open AI Generator Content

It can save your time and effort in various aspects of the content creation process, allowing them to focus on higher-level tasks.

1. Prompt templates

Elevate your social media presence with a constant flow of post ideas and creative caption prompts supplied by our template prompts, making your content stand out effortlessly!

2. Creative Caption Generation

Unleash the power of creativity with our Creative Caption Generation feature, crafting compelling and unique captions effortlessly.

3. Automatically Add Trending Hashtags & Vibrant Emojis

Stackposts seamlessly integrates emojis and hashtags into your posts, crafting shareable content in seconds. Elevate your social media presence with our intuitive platform, making your content creation process swift and engaging.

4. Tailor your posts

Our artificial intelligence empowers you to generate diverse post variations, ensuring the freshness of your content and catering to various target audiences.

Tools

Watermark

Watermarks can be added to images using the Stackposts Watermark tool that is included in the main script. It offers built-in watermarking features to help you protect your posts which remain visible even if the content is downloaded or shared by others.

FAQs

FAQs (Frequently Asked Questions) are an essential component of any website as they provide a quick and convenient way for users to find answers to common questions about a company, product, or service.

Settings

1. Customize the Color Scheme

This feature is important for branding, aesthetics, accessibility, emotional impact, and differentiation. By choosing the right colours and creating a cohesive colour scheme, your website can create a more engaging and impactful user experience.

2. Notifications

A notifications feature on a website is a tool that allows you to communicate with your users and keep them updated on important events, messages, or changes.

3. Social Logins

Social logins allow users to sign up for or log into your website using their existing social media accounts, such as Facebook, Twitter, or Google.

4. Multiple Languages

By offering multiple languages, a website can reach a larger audience worldwide. Potential customers who use a different language from the

primary language of the website can still access and understand its content, increasing your sales.

5. Email Templates

This feature is a useful tool for saving time, ensuring consistency, and providing a professional look and feel to emails sent for various purposes when you use the
