Description

Swipple - Easy File Transfer Free Download

Swipple V2.0 - Easy File Transfer (SAAS)

Swipple is an easy online file transfer solution that can be used to share large files by email or by generating links, with many options to protect files.

You can send files anytime and anywhere just by creating an account or without an account, and the script is SAAS with pricing plans that you can set from admin panel so you can start earning money from your customers subscriptions.
