### Description

TokenLite V1.5.0 ICO / STO Token Sale Management Dashboard - ICO Admin Script Free Download

TokenLite – ICO / STO Token Sale Management Dashboard for ICO Startup / ICO Agencies or Cryptocurrency Based Company. Softnio introducing full functional dashboard for managing your ICO / STO token sale. TokenLite – ICO Script brings all kind of components, functional features that helps to Cryptocurrency Agencies / Startup to Lunching their ICO, sale their token, and get contribution from investor.

If you going to start your new business with crypto/blockchain then you might need to run ICO / STO / IEO to sale your token/coin and raising funds or get investment and make your project/product success. You are in right place because TokenLite helps you to do everything very easily.

Our ICO Admin Scripts helps your contributor to purchase your token easily. You can manage your token amount, soft-cap/hard-cap, token price, bonus through each stage and set payment wallet address that automatically apply on purchase process.

It's support major and most popular cryptocurrency (ETH, LTC, BTC, BCH, BNB, TRX, XLM, XRP, USDT, USDC, DASH) with fiat currency (USD, GBP, EUR, CAD, AUD, TRY, NGN, INR, RUB) so helps you sales your token in any currency. You can easily manage which currency will be accept or not and also can be set based currency your own.

It has built-in referral bonus management system so investor/contributor can invite more people to bring into your platform. You can specify the bonus amount for both user as who invite and who join and bonus will automatically adjust once transaction approved.

TokenLite included 2 Layer security option as Two-Factor Authentication (2FA) for every users so they can protect their account more strongly. Also system allow to change password through email confirmation which give more security for users.

In latest version included export option that allow to download all the transaction/user list in CSV with different edition (Entire, Compact, Minimal). Export also allows on after search/filter which is helps you get perfect export data for reuse.

Backbone of TokenLite is Laravel v8.x – the most popular and secure PHP web framework. It also used jQuery, Bootstrap v4 and Back-end UI of TokenWiz. You can easily customize everything, add your own functionality, other php-library, add-on or module, if you familiar with PHP/Laravel.
