app supported**

**multiple
payment
gateways
supported**

**multiple
frontend
themes
included**

and lots more!

Free Android Mobile App

The TrainEasy client app is a FREE app that anyone can use to connect to and consume e-learning from a TrainEasy installation. Your students will simply download this app, and perform a short one-time setup step that simply involves saving the domain name hosting your TrainEasy installation. After this, they can immediately start consuming your courses, just as they would have on the white labeled version of our APP.

The TrainEasy Client app can be downloaded here: <https://play.google.com/store/apps/details?id=com.intermaticsng.traineasyclient> . Simply share this link with your students to get them started immediately.

- Video/Audio file management with S3 support
- Blogging & Content Management
- And Lots More!

FEATURES INCLUDE

Course and Session Management

Create multiple online courses, training sessions or a combination of both! Configure each based on your needs. Optionally enable payment collection for enrollment. The following payment methods are available: Paypal, Stripe, 2Checkout, Ipay, Payfast, PayTabs, PayUMoney, Paystack, Rave, and others. TrainEasy supports all currencies.

Class Management

Create multiple reusable classes and assign them to sessions or courses to create your online courses or session calendar. You can also assign instructors to courses, sessions, and classes and schedule upcoming class reminders for students and instructors!

Online Tests/Assessments

TrainEasy comes with a powerful online testing/assessment feature. Save yourself the paperwork and switch to TrainEasy's computer-based tests! Tests can be created with multiple options such as Time limit, Session restriction, Attempt limits, etc. Students will see their results immediately after completing the test.

Student Management

Students can register on the front end of the application or can be added manually through the backend. TrainEasy also features a form builder that enables you to add as many registration fields and attributes to a student as you require.

Role Management

Traineasy supports two major roles: Student & Admin. Admins can be subdivided into multiple roles. Out of the box, you have Super Administrator, Administrator, and Instructor. TrainEasy enables you to create new roles with associated permissions for each role.

Email & SMS Reminders

TrainEasy can automatically send reminders to Students and Instructors about upcoming classes, tests, and homework.

Attendance Management

TrainEasy makes it easy for you to monitor and log attendance records for your students. There are multiple attendance logging methods available that enable you to set attendance either online or offline.

Payment Methods

TrainEasy ships with multiple payment methods for receiving payment for session/course enrollment. Below is a list of all our currently supported gateways

Homework & Revision Notes

TrainEasy comes with a powerful Homework feature that enables you to create homework for your students. Students can submit homework via text response or file upload. Admins can review and grade homework from an easy-to-use interface. TrainEasy also allows you to create revision notes for each class that only enrolled students can access. The system will also notify all enrolled students whenever a new note is uploaded.

Content Management

Easily add new information pages to your site. TrainEasy's content management system makes it very easy to manage pages on your site as well as your homepage. Add slideshows, signup forms, session calendars, text, and more to your homepage in seconds. The content management system makes TrainEasy able to serve as your company's website as well as a student portal

Configuration

TrainEasy enables you to configure lots of settings on your site. Change colors, set smtp mail credentials, change the text on menus, hide or show menu options, and lots more!

Student Discussions

TrainEasy comes with an easy-to-use student support system that gives them the opportunity to privately hold discussions with their Instructors. The feature comes with an email alert system that notifies all available instructors of new questions and notifies students of updates to their questions. There is also a student forum feature that enables students enrolled in a session or course to interact with themselves.

Certificates

TrainEasy comes with a powerful certificate generation feature that enables you totally eliminate the need for creating paper certificates for each Student at the conclusion of your training programs. This feature can also be used to generate other documents such as admission letters.

Download Management

TrainEasy comes with a powerful download management feature that enables admins/instructors easily share files with students. This feature also enables you to restrict certain files to students that are enrolled in sessions you specify.

Powerful API

TrainEasy ships with a JSON API. This enables you to deploy our Ionic Mobile App for Android and IOS (available as a separate purchase)

Multiple Themes

Change the look of the student front end with the click of a button! TrainEasy supports 3 themes that you can choose from and customize to give your front end a unique and professional look.

Multiple Languages Supported

TrainEasy comes with support for multiple languages! 18 languages are supported out of the box and can be easily switched from the settings page. The following languages are included: English, German, Spanish, French, Portuguese, Italian, Dutch, Polish, Russian, Romanian, Bulgarian, Malay, Czech, Danish, Estonian, Chinese, Arabic, Indonesian, and Korean. Additional languages can be added easily.

Disable Frontend Feature

TrainEasy provides a feature that enables you to completely disable the frontend features of your site. This means pages like the Homepage, Blog, Articles, and Contact pages will not be accessible to users. With the front end disabled, the default landing page will be the login page. Users can also register if registration is enabled. Only logged-in users will be able to view your course/session catalog.
