Description

U Mobile Malaysia Current Vector Logo Free Download

U Mobile is a data-centric and multiple award-winning mobile data service company in Malaysia. We may be the youngest telco in the country but our understanding of customer preferences has enabled us to grow from strength to strength.

Our rapid response to changes in consumer behaviour and needs has enabled us to be the first in industry to introduce various products and services such as free monthly data for prepaid plans and microfinancing for smartphones as well as unlimited data to customers at very affordable prices.

In our quest to become Malaysia's preferred digital telco, we have also introduced many first-of-its-kind digital services to the market such as telcoassurance products. U Mobile also has a comprehensive fintech ecosystem offering that consists of GoPayz, a universal e-wallet which offers consumers digital financial and lifestyle services, and GoBiz, a digital payment acceptance solution designed for businesses both big and small.

Being the youngest telco also means U Mobile has the most modern network infrastructure that enables us to scale up based on demand in the most efficient way. Our award-winning robust network is also ready for 5G and beyond and we are committed to continue investing in our network so that our customers will always enjoy a superior network experience.
