### Description

uAdmin is a premium admin template built on top of the popular Bootstrap Framework and comes with a flat design direction. It overwrites the default style of the framework to match its own and at the same time extends it to a large degree without being too complicated and losing its simplicity. Even if you are not familiar with the framework, theme's components can be easily replicated without losing your focus on the development. It is a professional and flexible admin template/skin solution and can be used to build all kind of projects such as web applications or backend website solutions. We encourage you to have a good look at the live demo and discover all the features included.
