### Description

UMP Extended Shortcodes V1.3 WP Plugin Free Download

UMP Extended Shortcodes is Ultimate Membership Pro AddOn.

Unlock your WordPress website's potential with the use of Ultimate Membership Pro

One of the most useful WordPress plugins for website admins, Extended Shortcodes, provides a list of shortcodes entirely designed to add practicability and versatility to membership-based systems.

### How It Works?

Admins have complete control over how content is organized and displayed to users based on their membership type. Using this plugin, you can now show/hide content to registered/unregistered members, display links and buttons anywhere on the page, ensure access to restricted content to visitors based on their subscription type/role, and many more.

The installation process is easy: all you have to do is upload the plugin and enable it with the press of a button.

Long gone are the days of tweaking your code for every small change. Organizing the content on your WordPress website has never been easier.

Thanks to this plugin, you can focus more on delivering the best user experience and less on insignificant tasks.

The shortcodes list is periodically updated and modified based on new functionalities that get released. Whenever a new functionality is added, its shortcode will be uploaded accordingly.

### What Are The Benefits Of Using UMP Extended Shortcodes?

Feel free to add a predefined specific functionality almost anywhere on the website.

According to the subscription, you can control the display of content in some sections instead of restricting the entire page.

The most frequently used links that lead to the login or registration page can be placed in the most visible places.
