Description

WAPWhatsApp APK v16

WAPWhatsApp APK

WAPWhatsApp is one of the most intriguing mods since its development did not depend on the stable version, same with most of the mods, however, on the wagger adaptations publicly released by the North American organization. Therefore, it takes advantage of specific functions that don't get around to being implemented.

Features

The great thing about WAPWhatsApp is that it enables us to arrange many privacy options, like concealing the time and date when copying someone else's message and a lot more things. These are some of the primary features of this mod:

Diverse UIs.

Four unique versions to be downloaded.

More emojis.

They have broadened privacy features, for example, concealing the time and data when copying messages.

The probability to customize the quality, size, and length of the status.

Group message counter.

Change the limit to shared picture use and video size.

No advertisements or watermarks.

All of these features help to improve the performance and functions of the first application. It offers new features and minor changes that are focused around providing the user with more freedom with regards to customizing our chats and messaging or altering the visual aspect of the user interface. New hues and textual styles, having the option to change their type and size.
