Description

Web Security Vector Logo Free Download

Internet security is a branch of computer security. It encompasses the Internet, browser security, web site security, and network security as it applies to other applications or operating systems as a whole. Its objective is to establish rules and measures to use against attacks over the Internet. The Internet is an inherently insecure channel for information exchange, with high risk of intrusion or fraud, such as phishing, online viruses, trojans, ransomware and worms.

Many methods are used to combat these threats, including encryption and ground-up engineering.

Create using Adobe Illustrator CC 2020
