### Description

#### WooCommerce Currency Switcher V1.9.8 WP Plugin Free Download

WBW Currency Switcher for WooCommerce Plugin allows you to display prices in multiple currencies, use the unlimited number of currencies and set the exchange rate for each currency manually or automatically. The plugin makes full use of Cryptocompare and Free Converter platforms, providing the latest exchange rates, and converting displayed prices in real-time. Currency can be changed automatically according to the customer's IP.

You can use Currency Switcher with additional modules – Currency Rates, Converter and Tooltip modes. This will give your customers the opportunity to pay with their preferred currency, thus increasing shop sales. The best currency switcher to make an online store working with different currencies!

#### Currency Switcher Features

Unlimited number of currencies

You can convert any currency you want and add as many currencies as you need. Select the currency from a list and with simple settings add it to the Currency switcher straight away to your online store.

#### Manual/ automatic exchange rate for each currency

Currency switcher uses Cryptocompare and Free Converter aggregatots. The plugin allows setting exchange rates manually and automatically. Besides, the Pro version has a feature of an automatic exchange rate updates available for a certain period: every minute, hourly, twice a day, daily, weekly. You can set the option "Notify admin by email" about the last exchange rate values every time when it updates..

#### Checkout in selected currency

Plugin provides an opportunity to change the currency at checkout and allow customers to pay with their selected (preferred) currency. This feature is perfect for WooCommerce shops in case of currencies which aren't included in this list: "AUD, BRL, CAD, CZK, DKK, EUR, HKD, HUF, ILS, JPY, MYR, MXN, NOK, NZD, PHP, PLN, GBP, SGD, SEK, CHF, TWD, THB, USD". It's also useful if you want to convert a given currency into a different PayPal currency to avoid conversion fees by PayPal.

#### Display setting for each currency

Set the Base currency, Name, Title, Symbol, Position, Cents, Rate. Insert the rate manually or press the Get Rate button in one click.

#### Currency switcher design

With Currency Plugin, you can make the Currency Switcher which is not just functional but has a beautiful design as well. Simple, Rotating, Floating types of a switcher. Position, Color settings for all elements of switcher easily make the Switcher unique, so it perfectly matches the store design.

#### Custom flags and currencies\*\*

If you need to add any custom currency or your own designed icon, you can easily do it!

#### Compatible with WordPress themes

WBW Currency Switcher for WooCommerce perfectly works with any WordPress theme. Plugins are tested at least on 4 testing servers before the release of each.

#### Currency converter, Currency Rates and Tooltip\*\*

The plugin comes with three additional modes– tooltip, currency rates, and currency converter. These modes give the user an opportunity to display the rate as well as to convert it at the same time and see the tooltip with a price cost of the product compared to the other currencies. You have an opportunity to customize and set their display matching the design of your store and easily place them on the pages, product categories, and custom post types.

#### Increase the cart conversion

Store conversion rates could be improved up to 30% if you let the customers see the prices in a preferred currency. You don't lose customers just because they don't have the option to pay in their native currency.

#### Geo IP rules\*\*

When Geo IP rules feature is on, Currencies Switcher will automatically identify your customers' countries by their IP address and they will see products in their country's currency. Besides, using custom settings you can specify the definition of the currency yourself, just select your list of countries for each currency.

#### Mobile Friendly

With our plugin, you can have two versions of currency switcher, rates, and converter for your website : one for smartphones, one for desktops and laptops. The plugin automatically identifies the device accessing your website and then automatically display a mobile-optimized version to the user. You can choose the devices that will display modules: mobile, desktops, or both. A nice bonus is an opportunity to choose the size of the screen on which your site will be displayed in a mobile version.
