Description

Worketic - Marketplace for Freelancers

Worketic V2.9 - Market Place for Freelancers

Worketic is a Freelance Marketplace Laravel Application with some exciting features and excellent code quality. It has been designed and developed after thorough research to cater the requirements of people interested in building freelance marketplace or other similar projects. The design is contemporary but at the same time it focuses on the usability, visual hierarchy and aesthetics to ensure easy navigation for the end users.

Main Features

Detailed Dashboard

The dashboard of this theme is professionally designed to enhance the usability and user experience. It will enable users to navigate through the site easily.

Powerful search for Jobs, Freelancers and Employers

The search function is very powerful and you can see this in the demo.

Private One to One Chat

This system also has a builtin one to one message inbox system to enable users to communicate with each other if they had any questions regarding work or proposal etc.

Reviews system multi ratings

It has a built in review system that will allow employers to feedback and rate the work carried out by freelancers.

Email template settings

Extensive email template settings would allow you to modify the system emails according to your requirements.
