### Description

WPBakery Page Builder V6.13.0 WP Plugin Free Download

WPBakery WordPress Page Builder Plugin with Frontend and Backend Editor

Introducing WPBakery Page Builder – your best solution for crafting exceptional WordPress websites with ease. Designed for both professionals and individuals, WPBakery offers a seamless no-code and low-code experience. With its user-friendly drag-and-drop interface and a vast library of customizable elements, you can effortlessly turn your creative ideas into reality. Experience the power of a backend and frontend editor in one tool, and redefine your website design journey today!

Yes, WPBakery Page Builder comes bundled with 2 types of editors allowing you to choose your preferred view. Create your WordPress website with a backend schematic editor or move your page-building process to frontend and see your results live.

Not only that, WPBakery Page Builder gives you full control over responsiveness. Create responsive websites automatically or adjust preferences you need to ensure your WordPress website looks perfect on mobile or tablet. WPBakery Page Builder has everything it takes to create a responsive website. Save your money on purchasing different devices with WPBakery Page Builder Responsive Preview available out of the box.

WPBakery also comes with a built-in AI assistant that will generate text, improve text that's already on the page, translate it to nearly any language, and generate custom code when you need just that little extra to make your site unique.

To make sure that your websites attract as much traffic as possible, WPBakery SEO is available to all WPBakery users. This feature allows you to enhance visibility and get better search results without leaving the editor.

It is really easy to start building your WordPress website with WPBakery Page Builder:

Add rows and columns to your page

Choose from over 50+ predefined content elements or start from professionally designed template

Drag elements around your page

Simply adjust element settings via intuitive controls and options

Publish your page

And that's not all! With the page builder, you don't have to be a developer to create a page. With WPBakery Page Builder, you don't have to be a designer either.

Extensions: 200+ unique addons with hundreds of content elements available exclusively to WPBakery Page Builder

Template Library: Downloadable layout templates with pro templates updated regularly. Build your layouts literally in seconds

WPBakery AI: Ask your AI assistant to generate a copy for the page or custom code that will be automatically applied

WPBakery SEO: Boost your website's visibility with a built-in SEO toolkit

If you're a web developer, there are many reasons to love WPBakery. 1. We offer a comprehensive knowledge base describing our developer API so you can extend WPBakery Page Builder. For those who don't wish to code, WPBakery Page Builder offers Shortcode Mapper, allowing you to add 3rd party shortcodes to your WPBakery Page Builder content elements. With WPBakery Page Builder you can work on new or existing websites as it will recognize your existing content and adapt to any WordPress website. Forget about page builders tailored for a specific theme to get you locked up – WPBakery Page Builder works with any WordPress theme.

WPBakery Page Builder is one of the best-selling drag-and-drop frontend and backend page builder plugins on the market – already powering 5,800,000+ websites. Redefine your website design journey today with WPBakery!
