Description

WPNotif V2.4.0.7 WP Plugin Free Download

WPNotif V2.4.0.7 - WordPress SMS & WhatsApp Notifications

Wpnotif lets you send notifications using SMS or WhatsApp to your customers from your WordPress site. The plugin is also fully compatible with WooCommerce and you can setup automatic notification triggers for your customers whenever they create a new order or whenever the status of that order is changed. Site admins including, store owners, editors etc can also setup messages or WhatsApp notifications for themselves.

Different Gateway for Different Countries

You can also setup different gateways for different countries which can help you in reducing your SMS cost and at the same time increase deliverability

You have the right to chose the cheapest gateway you want or use a combination of those.

Multi-Lingual SMS Template

Having customers from different countries who speak different languages is not a problem, you can setup SMS templates in multiple languages.

Why send same message again and again when you can make your customer feel special by sending different message to everyone or every subsequent message.

WhatsApp Message Notification

Send WhatsApp message notification to your customers alongside SMS or if you don't want to send SMS notifications then you can turn that setting off and just use WhatsApp Messages.

Smart country code detection

It doesn't matter if your mobile number field has country code in it or not, WPNotif is smart enough to find it out and if its not present then put the country code in place automatically

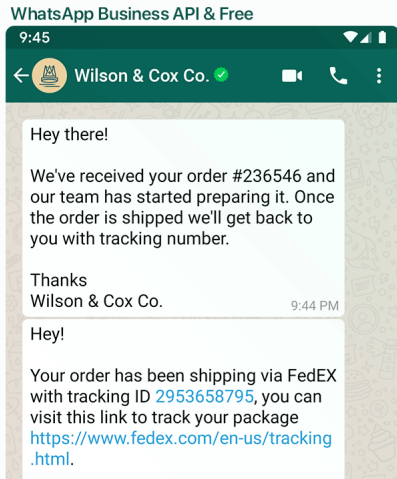

Use Multiple Gateways at Once

Set different gateways for different countries and reduce the message cost drastically and increase deliverability at the same time

We Support WhatsApp Messages

Setup WhatsApp message notifications for your customers alongside SMS, Don't want to use SMS !! You can even use WhatsApp alone

Schedule Message Newsletters

Run SMS or WhatsApp Newsletters regarding your upcoming sale, new post, offers or anything you can think of.

ADD NEW DELETE SELECTED

NAME	EXECUTION DATE	STATUS

WooCommerce Order Status

WPNotif is 100% compatible with WooCommerce, even if you are using custom order status you will be able to setup notifications.

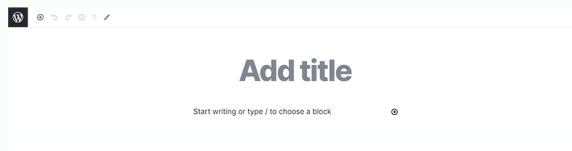

Order #10000 details
Payment via Credit Card. Customer IP: 111.111.11.111

General	Billing
Date created: 2019-06-25 @ 18 : 32	Stephanie J. Joshua 331 Goldleaf Ln Lyndhurst, NJ 07649 United States
Status: My Custom Order Status	Email address: stephanie@e...
Customer: Stephanie J. Joshua (#19326 – stephanie@e...)	Phone: 3214443123

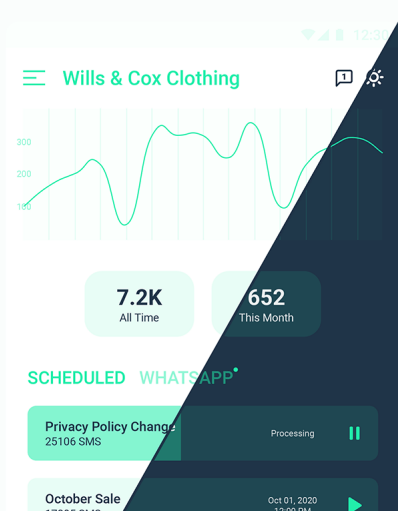

New Post Notifications

Send SMS or WhatsApp message notifications to your users everytime you post on your website. Works with posts, pages or any other post type.

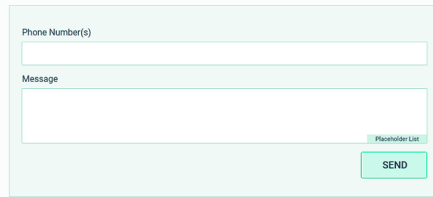

Send Messages Using Phone App

Use your android phone and your current SMS plan to send messages. You can even send WhatsApp Business Message from the app.

Send Quick SMS

You can also send SMS to any number and even in bulk from our settings panel

The screenshot shows a form with two input fields: 'Phone Number(s)' and 'Message'. Below the 'Message' field is a 'Placeholder List' button. A 'SEND' button is located at the bottom right of the form.

Custom Placeholders

80+ ready to use placeholders and you are not limited by them. We support custom meta placeholders, using that create your own placeholder.

`{{order-track$2663594155`

GDPR Compatible

Ask your customers if they want to receive notification on SMS or WhatsApp or both and then send them messages accordingly

- I would like to receive updates on SMS
- I would like to receive updates on WhatsApp

Translation Ready

WPNotif is translation ready, so you can translate the plugin to your language easily.

SOME OTHER FEATURES INCLUDE

- Multisite Support
- 20+ SMS Integrated Gateways
- Quick Send SMS (Manual)
- Send SMS from Order Page
- GDPR Compliant
- Translation Ready
- Full WooCommerce Support
- Automatic WooCommerce Order Status Update Notification
